### **Crazy About Her Spanish Boss** Harlequin

Over many millennia, farmers across the world have domesticated literally thousands of species and developed tens of thousands of varieties of these plants. Despite the astonishing agricultural diversity that existed long ago, the world's current food base has narrowed to a dangerous level. By studying the long and dynamic history of farming in the ancient past, archaeology can play a part in helping ensure the stability of the human food supply by identifying once-important crops and showing where and how such crops were grown in the past. Thanks to this work, extinct crops might even be redomesticated from their wild progenitors. New Lives for Ancient and Extinct Crops profiles nine plant species that were important contributors to human diets and had medicinal uses in antiquity: maygrass, chenopod, marshelder, agave, little barley, chia, arrowroot, little millet, and bitter vetch. Each chapter is written by a well-known scholar, who illustrates the global value of the ancient crop record to inform the present. From eastern and western North America, Mesoamerica, South America, western Asia, and south-central Asia, the contributors provide examples of the unexpected wealth of information available in the archaeological record about ancient and extinct crops.

They were sentenced to life—with each other! Beth Maitland, the most unconventional member of the Maitland clan, is always up for an adventure. But getting framed for a murder she didn't commit isn't exactly her idea of fun... Detective Ty Redstone thinks he's seen and heard it all. But when he discovers beautiful, free-spirited Beth on the wrong side of the law, he suddenly wants to see a lot more... Even though the odds are against her, Beth can tell that Ty believes she's innocent. But he has to prove it, and if Beth has anything to do with it, they'll be proving it together. Only the more she's around the seriously sexy detective, the more Beth wishes she'd been accused of taking up

a life of crime earlier...

If he wanted a marriage of convenience, it would be at her convenience! R. J. Maitland, President of Maitland Maternity, was forced to do some major damage control. The media circus surrounding allegations that he had fathered an abandoned child had left his reputation in tatters and the clinic in jeopardy. Dana Dillinger had been R.J.'s right hand for years—loyal, dependable...and hopelessly, secretly in love with him. When he suggested that marriage was the best way to salvage the situation and prove he wasn't the playboy the press had labeled him, Dana accepted his "proposal." With one exception... R.J. wanted a marriage in name only—no sex, just marriage. Dana wanted all the marital rights of a bride—including and especially sex—or the deal was off. Between a rock and a hard place, R.J. agreed, not knowing what he'd just gotten himself into!

Mothering her ex-love's children was definitely not in her job description! Ellie Maitland was goal-oriented. She operated on five-year plans. Finishing her master's degree by night, serving as chief administrator at her family's renowned clinic by day, she was out to prove herself, big time. Sloan Cassidy had eighteen-month-old twin daughters, and not a clue in the world how to handle them since his wife had left. But he knew who did. No way was Ellie going to let herself be roped into helping to care for Sloan's little girls. Those kids brought out all the maternal instincts she wanted to suppress. And she had no time. And Sloan was way too appealing. And everyone knew the cowboy had broken her heart ten years ago. Except Sloan.

"In this strange and fascinating novel, each character is perhaps the fruit of the delirium of the others. But who dreams who? There is Jean Danthès, French ambassador to Rome, inconsolable of the

disappearance and debasement of Europe, the true one, that of the 18th century, which was called the Europe of Enlightenment. There is Malwina von Leyden, class adventurer and magician..."-- Goodreads

Could this all be a bad dream? How was she to know? Rebecca had far more questions than answers. Tisbury, Massachusetts, Martha's Vineyard The last thing sixth-grade teacher Rebecca O'Neill wants to do during the final week of her summer break is chaperone twenty-five kids on a six-night, seven-day trip aboard the schooner Shenandoah. But after a desperate phone call from the school principal, she doesn't have a choice. Worse, the ship is rumored to be "haunted." Five years ago, during the Holmes Hole student cruise, teacher Melissa Smith complained about hearing voices and seeing visions, then disappeared without a trace--from the very same cabin where Rebecca will be staying. Everything seems normal on Sunday as Rebecca boards the impressive Shenandoah. But as she sits in Cabin 8, she hears hushed voices that don't sound like they're from this century. Mike, a crewmember, insists he believes the crazy Island story that Melissa time-traveled to Colonial Boston. His eerie interest in constantly tracking Rebecca's whereabouts rattles her nerves. Her first night onboard, Rebecca drifts off to sleep...and wakes the following morning with memories of a secretive conversation about a battle with Britain. Monday night Rebecca crawls into her bunk after an adventurous day of sailing, swimming, and overseeing students. She's startled awake when a man grabs her and yells, "Stowaway " Dragged in front of Captain Benjamin Reed, she looks up into the most gorgeous brown eyes she's ever seen.... A Vineyard Romance. Romance, history, adventure. Get swept into the exciting Winds of Change series. Book 1, Winds of Change.

Airman, war hero, immigrant, law student, diplomat, novelist and celebrity spouse, Romain Gary had several lives thrust upon him by the history of the twentieth century, but he also aspired to lead many more. He wrote more than two dozen books and a score of short stories under several different names in two languages, English and French, neither of which was his mother tongue. Gary had a gift for narrative that endeared him to ordinary readers, but won him little respect among critics far more intellectual than he could ever be. His varied and entertaining writing career tells a different story about the making of modern literary culture from the one we are accustomed to hearing. Born Roman Kacew in Vilna (now Lithuania) in 1914 and raised by only his mother after his father left them, Gary rose to become French Consul General in Los Angeles and the only man ever to win the Goncourt Prize twice. This biography follows the many threads that lead from Gary's wartime adventures and early literary career to his years in Hollywood and his marriage to the actress Jean Seberg. It illuminates his works in all their incarnations, and culminates in the tale of his most brilliant deception: the fabrication of a complex identity for his most successful nom de plume, Émile Ajar. In his new portrait of Gary, David Bellos brings biographical research together with literary

and cultural analysis to make sense of the many lives of Romain Gary - a hero fit for our times, as well as his own.

Refusing to believe it's a mere coincidence, he decides to follow her. And when he sees her and her boyfriend get into an argument that turns violent, he's there to stop the assault. A violinist for the New York Philharmonic, Maggie is determined to escape her boyfriend's abusive grip. Staying with Drake while she sorts herself out, she discovers an undeniable attraction to her mysterious protector. But as they grow closer, can he reveal the truth of why he was there when she needed him?

The Detective's Dilemma University of Pennsylvania Press

Thermodynamics: Fundamentals and Applications for Chemical Engineers explores the concepts and properties of thermodynamics and illustrates how they can be applied to solve practical problems. The book introduces the fundamentals of thermodynamics for multi-phase, multi-component systems, providing a framework for dealing with problems in chemical engineering including mixing, compressing, and distilling fluids. The first eight chapters of Thermodynamics focus on single-component thermodynamics, introducing important concepts that will be referenced throughout subsequent chapters. Later chapters introduce modeling for multi-component systems. Topics covered include: properties as a function of state variables; first and second law of thermodynamics; power cycles, combustion, refrigeration cycles, and heat pumps; equilibrium phase relationships; correlations and calculations of vapor-liquid equilibrium data; elementary theories of solutions; and the efficiency of multicomponent separation and reaction processes. The Second Law of Thermodynamics, availability concepts, and process efficiency receive extensive coverage. The clear, well-organized sequence of the chapters helps students successfully learn and retain information. Each of the fifteen chapters includes

updated sample problems that underline key principles and problem-solving steps. The book has numerous appendixes for quick reference on everything from conversion factors to Francis constants, and from properties of pure substances to thermodynamics tables and Diagrams. Thermodynamics can be used by chemical, petroleum, and mechanical engineering departments in introductory and intermediate courses on engineering thermodynamics and thermodynamics fundamentals. Born and raised in Chile, Miguel T. Fleischer earned his M.S. and Ph.D. in chemical engineering from the University of Houston where he is an adjunct professor and the undergraduate program director of the Chemical and Biomolecular Engineering Department. Dr. Fleischer worked at Royal Dutch Shell for more

than 26 years in research and development, manufacturing, finance, and management. He began teaching when he was an undergraduate student in Chile where he developed a program sponsored by Universidad Catolica de Chile to prepare high school students for college. He was the co-owner and CEO of Fleischer International Trading, a private enterprise that imported and distributed wines from all over the world for 13 years. He continued teaching while he was a graduate student at the University of Houston. He has received the Outstanding Lecturer award of the Cullen College of Engineering four times, the University's Teaching Excellence Award, the Cullen College of Engineering's Career Teaching Award, and the Cullen College of Engineering's Distinguished Engineering Alumni Award.

Newly updated and backed by decades of research, this classic guide will equip leaders and team members alike to unleash the power of teamwork. Never before in the history of the workplace has the concept of teamwork been more important to the functioning of successful organizations. Ken Blanchard, bestselling coauthor of *Raving Fans*, *The One Minute Manager*® and *Gung Ho!*, teams up with Donald Carew and Eunice Parisi-Carew to explain how all groups move through four stages of development on their way to becoming high performing teams—orientation, dissatisfaction, integration and production. The authors then show how a manager can help any group become effective quickly and with a minimum of stress.
