Why do we feel bad at the zoo? In a fascinating counterhistory of American zoos in the 1960s and 1970s, Lisa Uddin revisits the familiar narrative of zoo reform, from naked cages to more naturalistic enclosures. She argues that reform belongs to the story of cities and feelings toward many of their human inhabitants. In *Zoo Renewal*, Uddin demonstrates how efforts to make the zoo more natural and a haven for particular species reflected white fears about the American city—and, pointedly, how the shame many visitors felt in observing confined animals drew on broader anxieties about race and urban life. Examining the campaign against cages, renovations at the National Zoo in Washington, D.C. and the San Diego Zoo, and the cases of a rare female white Bengal tiger and a collection of southern white rhinoceroses, Uddin unpacks episodes that challenge assumptions that zoos are about other worlds and other creatures and expand the history of U.S. urbanism. Uddin shows how the drive to protect endangered species and to ensure larger, safer zoos was shaped by struggles over urban decay, suburban growth, and the dilemmas

of postwar American whiteness. In so doing, *Zoo Renewal* ultimately reveals how feeling bad, or good, at the zoo is connected to our feelings about American cities and their residents.

David Mamet has been a controversial, defining force in nearly every creative endeavor—now he turns his attention to politics. In recent years, David Mamet realized that the so-called mainstream media outlets he relied on were irredeemably biased, peddling a hypocritical and deeply flawed worldview. In 2008 Mamet wrote a hugely controversial op-ed for the *Village Voice*, "Why I Am No Longer a 'Brain-Dead Liberal'", in which he methodically attacked liberal beliefs, eviscerating them as efficiently as he did Method acting in his bestselling book *True and False*. Now Mamet employs his trademark intellectual force and vigor to take on all the key political issues of our times, from religion to political correctness to global warming. The legendary playwright, author, director, and filmmaker pulls no punches in his art or in his politics. And as a former liberal who woke up, Mamet will win over an entirely new audience of others who have grown irate over America's current direction.

In *Medieval Identity Machines*, Jeffrey J. Cohen examines the messiness, permeability, and perversity of medieval bodies, arguing that human identity always exceeds the limits of the flesh. Combining critical theory with a rigorous reading of medieval texts, Cohen asks if the category OC humanOCO isnOCO too small to contain the multiplicity of identities."

Despite centuries of campaigning, women still earn less and have less power than men. Equality remains a goal not yet reached. In this incisive account of why this is the case, Mary Evans argues that optimistic narratives of progress and emancipation have served to obscure long-term structural inequalities between women and men, structural inequalities which are not only about gender but also about general social inequality. In widening the lenses on the persistence of gender inequality, Evans shows how in contemporary debates about social inequality gender is often ignored, implicitly side-lining critical aspects of relations between women and men. This engaging short book attempts to join up some of the dots in the ways that we think about both social and gender inequality, and offers a new perspective on a problem that still demands society's full attention.

Farming has been in John Connell's family for generations, but he never intended to follow in his father's footsteps. Until, one winter, he finds himself back on the farm and begins to learn the ways of the farmer and the way of the cows. Connell records the hypnotic rhythm of the farming day - cleaning the outhouses, milking the herd, tending to sickly lambs, helping the cows give birth. But alongside the routine events, there are the unforeseen moments when things go wrong: when a calf fails to thrive, when a sheep goes missing, when illness breaks out, when depression takes hold, when an argument erupts and things are said that cannot be unsaid. The Cow Book is the story of a calving season. It is also the story of the cow itself, from its domestication and worship as a God by the Ancient Egyptians to the modern practice of mechanized herds, via the figure of the cowboy, the destruction of the American buffalo, the demise of the aboriginal jackaroos and the consequences of BSE. And, above all, it is the story of Connell's life as a farmer, of his relationship with his birthplace of County Longford, with the community around the family farm, with the animals he tends, and with his father.

Many of the aristocrats profiled in John Buchan's novel *The Half-Hearted* are beset with crippling doubts about their own lifestyles and characters. Protagonist Lewis Haystoun is disgusted with his own inability to take a decisive stand on any issue of significance, and sets about to cure himself by undertaking a life-or-death campaign halfway around the world. This crowd-pleasing novel has something for everyone: romance, derring-do, and plenty of action and adventure.

One of the grim comedies of the twentieth century was that miserable victims of communist regimes would climb walls, swim rivers, dodge bullets, and find other desperate ways to achieve liberty in the West at the same time that progressive intellectuals would sentimentally proclaim that these very regimes were the wave of the future. A similar tragicomedy is playing out in our century: as the victims of despotism and backwardness from Third World nations pour into Western states, academics and intellectuals present Western life as a nightmare of inequality and oppression. In *The Servile Mind: How Democracy Erodes the Moral Life*, Kenneth Minogue explores the intelligentsia's love affair with social perfection and reveals how that idealistic dream is destroying exactly what has made the inventive Western world irresistible to the peoples of foreign lands. *The Servile Mind* looks at how Western morality has evolved into mere "politico-moral" posturing about admired ethical causes—from solving world poverty and creating peace to curing climate change. Today, merely making the correct noises and parading one's essential decency by having the correct opinions has become a substitute for individual moral responsibility. Instead, Minogue argues, we ask that our governments carry the burden of solving our social—and especially moral—problems for us. The irony is that the more we allow the state to determine our moral order, the more we need to be told how to behave and what to think. Such is the servile mind.

Through an examination of modern depictions of zoos, *Reading Zoos* presents a paradigm of how these institutions, and a range of reactions to them, illuminate the workings of our cultural sensibilities. The book explores how the nature of zoos and their significance to cultural consumers is portrayed in over 100 works. It explores what animals' captivity signifies about the people who create, maintain, and patronize zoos; Malamud argues that zoos represent a cultural danger, a deadening of our sensibilities, because the institutions - rather than fostering an appreciation for animals' attributes - convince spectators that people are the imperial species.

"A near-future layering of East and West, of religion and technology . . . and of love and its loss—all woven into an intriguing tapestry." —Diana Gabaldon, bestselling author of the *Outlander* series Winner of the Homer Award for Best Science Fiction Novel A renowned prima ballerina, Lucia del Mar is far more comfortable expressing herself through dance than with words. Shy and

introverted, she spends most of her spare time on her laptop. Still, Lucia's job forces her out of her comfort zone, which is how she winds up at a White House reception where she meets Rashid al-Jazari, the wealthy CEO of a multinational corporation. Although attracted to him, Lucia can't help but feel awkward and shrugs off their encounter as a one-time event. Not realizing he feels a similar attraction, she never imagines Rashid will seek out her performances; he is the last person she expects to see when her dance company travels to Italy. Their reunion takes an even more unexpected turn when they're both drugged and kidnapped. Although they overcome their abductors, it leaves them stranded in North Africa. For her own safety, Lucia agrees to marry Rashid, at least for the time being. As she recovers at his family compound in Morocco, reeling from their brush with danger, she struggles to fit into a culture she knows nothing about—and to deal with her growing feelings for Rashid. At the same time, at his secret office there, Rashid is developing a dramatic leap forward in artificial intelligence combined with virtual reality. He finds himself plunged into a fight for control of his work against powerful international forces, and caught in the middle, Lucia is swept into that battle . . . "A terrific novel, ripping a path from today's headlines to tomorrow's realities." —Robert J. Sawyer, Nebula Award-winning author *The Essential Guide to RF and Wireless* CRC Press From sixteenth-century cabinets of wonders to contemporary animal art, *The Breathless Zoo: Taxidermy and the Cultures of Longing* examines the cultural and poetic history of preserving animals in lively postures. But why would anyone want to preserve an animal, and what is this animal-thing now? Rachel Poliquin suggests that taxidermy is entwined with the enduring human longing to find meaning with and within the natural world. Her study draws out the longings at the heart of taxidermy—the longing for wonder, beauty, spectacle, order, narrative, allegory, and remembrance. In so doing, *The Breathless Zoo* explores the animal spectacles desired by particular communities, human assumptions of superiority, the yearnings for hidden truths within animal form, and the loneliness and longing that haunt our strange human existence, being both within and apart from nature.

With biting wit and amusing personal anecdotes, Harry Stein's *I Can't Believe I'm Sitting Next to a Republican* chronicles the everyday travails and triumphs of the plucky conservatives marooned in the liberal bastions that loathe them, from Manhattan to Hollywood, to all the noxious places in between. Surrounded by the insufferably smug and self-righteous -- from the angry old lady with the anti-war sign affixed to her walker to the random jerk at a dinner party quoting George Soros - these intrepid souls live in a hostile world; knowing that anytime a neighbor chances to learn their views on affirmative action, big government, feminism, the environment, abortion, multi-culturalism, sex education, the reliability of *The New York Times*, the scariness of evangelicals or (fill in the blank), his/her face will register stunned surprise and deep confusion. Or worse. Stein gives special attention to those conservatives working in professions dominated by the liberal elite--journalism, publishing, entertainment, and academia--celebrating their guts and sharing in their disdain for the dogmatism of the self-appointed creative and intellectual class. The result is a conservative's guide to love, work, friendship, dinner party mischief, and staying happy and unsmearred in liberal America.
