Sexual impurity creates a vicious circle, one that springs from misconceptions about Christ and further taints our understanding of Him. Yet another circle is available to men and women trapped in sexual sin, a circle of sexual redemption. When practiced as God intends, spirituality and sexuality both draw us closer to Christ. Spiritual maturity and sexual maturity go hand-in-hand, and together they hold out the promise of redemption and restoration needed by everyone who has been damaged by sexual sin. There is hope. Real change is possible; true intimacy is available. To the person who has failed time and time again sexually, God's message is simple: You, too, can be undefined.

The novel pits Ted Cogan, a forty-three-year-old surgeon and self-described womanizer, against Hank Madden, a handicapped veteran detective. From the outset it's not clear who is victim and who is victimizer, as the usually dispassionate Madden grapples with his long-suppressed prejudices and his obsession with bringing Ted Cogan to justice at any cost. It all leads up to the most stunning surprise ending since Scott Turow's Presumed Innocent.

Our lives are getting faster and faster. We are engulfed in constant distraction from email, social media and our 'always on' work culture. We are too busy, too overloaded with information and too focused on analytical left-brain thinking processes to be creative. Too Fast to Think exposes how our current work practices, media culture and education systems are detrimental to innovation. The

speed and noise of modern life is undermining the clarity and quiet that is essential to power individual thought. Our best ideas are often generated when we are free to think diffusely, in an uninterrupted environment, which is why moments of inspiration so often occur in places completely separate to our offices. To reclaim creativity, *Too Fast to Think* teaches you how to retrain your brain into allowing creative ideas to emerge, before they are shut down by interruption, distraction or the self-doubt of your over-rational brain. This is essential reading for anyone who wants to maximize their creative potential, as well as that of their team. Supported by cutting-edge research from the University of the Arts London and insightful interviews with business leaders, academics, artists, politicians and psychologists, Chris Lewis takes a holistic approach to explain the 8 crucial traits that are inherently linked to creation and innovation.
