*Archie (2015-) #25*

Penguin UK

xxxxx proposes a radical, new space for artistic exploration, with essential contributions from a diverse range of artists, theorists, and scientists. Combining intense background

material, code listings, screenshots, new translation, [the] xxxxx [reader] functions as both guide and manifesto for a thought movement which is radically opposed to entropic contemporary economies. xxxxx traces a clear line across eccentric and wide ranging texts under the rubric of life coding which can well be contrasted with the

death drive of cynical economy with roots in rationalism and enlightenment thought. Such philosophy, world as machine, informs its own deadly flipside embedded within language and technology. xxxxx totally unpicks this hiroshimic engraving, offering an dandyish alternative by way of deep examination of software and substance. Life coding is primarily active, subsuming deprecated psychogeography in favour of acute wonderland technology, wary of any assumed transparency. Texts such as Endonomadology, a text from celebrated biochemist and chaos theory pioneer Otto E. Roessler, who features

heavily throughout this intense volume, make plain the sadistic nature and active legacy of rationalist thought. At the same time, through the science of endophysics, a physics from the inside elaborated here, a delicate theory of the world as interface is proposed. xxxxx is very much concerned with the joyful elaboration of a new real; software-led propositions which are active and constructive in eviscerating contemporary economic culture. xxxxx embeds Perl Routines to Manipulate London, by way of software artist and Mongrel Graham Harwood, a Universal Dovetailer in the Lisp language from AI researcher Bruno

Marchal rewriting the universe as code, and self explanatory Pornographic Coding from plagiarist and author Stewart Home and code art guru Florian Cramer. Software is treated as magical, electromystical, contrasting with the tedious GUI desktop applications and user-led drudgery expressed within a vast ghost-authored literature which merely serves to rehearse again and again the demands of industry and economy. Key texts, which well explain the magic and sheer art of programming for the absolute beginner are published here. Software subjugation is made plain within the very title of media theorist Friedrich

Kittler's essay Protected Mode, published in this volume. Media, technology and destruction are further elaborated across this work in texts such as War.pl, Media and Drugs in Pynchon's Second World War, again from Kittler, and Simon Ford's elegant take on J.G Ballard's crashed cars exhibition of 1970, A Psychopathic Hymn. Software and its expansion stand in obvious relation to language. Attacking transparency means examining the prison cell or virus of language; life coding as William Burrough's cutup. And perhaps the most substantial and thorough-going examination is put forward by daring Vienna actionist

Oswald Wiener in his Notes on the Concept of the Bio-adapter which has been thankfully unearthed here. Equally, Olga Goriunova's extensive examination of a new Russian literary trend, the online male literature of udaff.com provides both a reexamination of culture and language, and an example of the diversity of xxxxx; a diversity well reflected in background texts ranging across subjects such as Leibniz' monadology, the ur-crash of supreme flaneur Thomas de Quincey and several rewritings of the forensic model of Jack the Ripper thanks to Stewart Home and Martin Howse. xxxxx liberates software from the machinic, and questions the

transparency of language, proposing a new world view, a sheer electromysticism which is well explained with reference to the works of Thomas Pynchon in Friedrich Kittler's essay, translated for the first time into English, which closes xxxxx. Further contributors include Hal Abelson, Leif Elggren, Jonathan Kemp, Aymeric Mansoux, and socialfiction.org.

**The Little Book of Sleep** Penguin UK --70% more content than first edition -- updated t0 2014 --30 photos and graphics In his most powerful investigation to date, award-winning journalist Walter M. Brasch digs into the natural gas industry and extracts the truth about fracking. This is

the long-awaited second edition to the critically-acclaimed first edition that explored all aspects of the controversies surrounding fracking. Hydraulic horizontal fracturing, better known as fracking, is the process of injecting as much as seven million gallons of water, proppants (like silica sand), and toxins into the earth to fracture the shale and extract methane. Politicians want natural gas drillers to come into their states, primarily because of the numbers of well-paying jobs the industry creates, the overall economic benefits, and the lower costs of natural gas to the consumer. Dr. Brasch investigates those claims, and provides an extensive

look at the money trail between the industry and the politicians' campaign receipts. Combining both scientific evidence and extensive interviews with those affected by fracking throughout the country, he concludes that errors made by the natural gas industry as well as the process itself have caused significant public health and the environmental problems that also affect agriculture, wildlife, and livestock.

**O's Little Book of Happiness** Westland  
This collection provides the first in-depth introduction to the theory of the religious imagination put forward by renowned philosopher Douglas Hedley, from his earliest essays to his principal writings.

Featuring Hedley's inaugural lecture delivered at Cambridge University in 2018, the book sheds light on his robust concept of religious imagination as the chief power of the soul's knowledge of the Divine and reveals its importance in contemporary metaphysics, ethics and politics. Chapters trace the development of the religious imagination in Christian Platonism from Late Antiquity to British Romanticism, drawing on Origen, Henry More and Samuel Taylor Coleridge, before providing a survey of alternative contemporary versions of the concept as outlined by Karl Rahner, René Girard and William P. Alston, as well as within Indian

philosophy. By bringing Christian Platonist thought into dialogue with contemporary philosophy and theology, the volume systematically reveals the relevance of Hedley's work to current debates in religious epistemology and metaphysics. It offers a comprehensive appraisal of the historical contribution of imagination to religious understanding and, as such, will be of great interest to philosophers, theologians and historians alike.

Sex workers are free in four respects: we don't have to cook for a husband; we don't have to wash his dirty clothes; we don't have to ask for his permission to raise our kids as we deem fit; we don't have to run after a husband claiming rights to his property.? Fiery, outspoken and often wickedly funny, this candid account of one woman's life as a

sex worker in Kerala became a bestseller when it was first published in Malayalam. Nalini Jameela, who takes her name from both Hindu and Muslim traditions, worked as a child in the clay mines. She has been a wife, mother, successful business woman and social activist ? as well as a sex worker ? at different stages of her life. This is Nalini Jameela's story, told in her inimitably honest and down- to-earth style, of her search for dignity, empowerment and freedom on her own terms.

"The story that the public were never supposed to read. Brilliantly written, a must-read for all those who want to know the real story." - Peter Karrie "Colourful, candid, humorous and poignant, I couldn't put the book down. Vibrant with unique and wonderful characters." - Iris Williams Just Help Yourself tells the story of The Senators - soon to become The Squires - in 1960s Britain. The band, formed by sixteen-year-old Vernon Hopkins, was to play something called rock and roll, the fresh musical import from America. From practising in his parents' front room to a reputation as the best band in south

Wales took just a year. But by 1961 they were in need of a new singer. Vernon recruited local boy Tommy Woodward, and the rest is history. Or is it? This is a classic tale of rock and roll. Successful young musicians from 'the provinces' are enticed to London by their hopeful management, in search of the game-changing record deal. After a period of hardship in Notting Hill, and the addition of a new and thrusting manager, they get a break: records are cut, gigs are played, tv appearances arrive. But as success and money comes the star singer is ruthlessly uncoupled from the band. While Tim Jones takes off, The Squires become increasingly peripheral. Finally, they

are cleverly and brutally sacked by the manager, and left to carve out their own careers in the shadow of Jones' success. Vernon Hopkins's authentic story reveals the highs and lows of the music business, and of the allegedly Swinging Sixties. It is full of gritty detail about life in Pontypridd and London, and with great insight into the music business, *Just Help Yourself* is a cautionary tales of ambition and success. Illustrated with previously unseen photographs from the author's archive. *Cornea* Macmillan Attempting to overcome their potential differences, the characters of these short stories move in and out of each other's orbits, emitting a few

photons of light. The unpredictable influence of the outside world, however, constantly alters, and even undermines, their efforts. 2000.
