 Over the past decades ASEAN countries have experienced rapid economic growth accompanied by a dramatic fall in poverty rates, but income inequality has not retreated. This research aims at identifying factors which could contribute to more equally distributed growth in ASEAN. To measure inclusive growth, we use a variable integrating per capita income growth and an equity index. A cross-country panel analysis of the impact of macro-structural factors on inclusive growth and its two components suggests that fiscal redistribution, female labor force participation, productivity growth, FDI inflows, digitalization, and savings significantly drive inclusive growth. A scenario analysis based on our econometric results suggests that the implementation of fiscal redistribution and labor market-oriented structural reforms could help significantly accelerate inclusive growth in ASEAN.

 This work brings together studies on the participation of employers' and workers' representatives in economic and social policy-making in a variety of contexts. A comparative analysis, eight-country chapters, and monographs on French-speaking Africa and Latin America cover both institutional settings and informal arrangements for tripartism.

 This revised edition of *Industrial Relations: Theory and Practice* follows the approach established successfully in preceding volumes edited by Paul Edwards. The focus is on Britain after a decade of public policy which has once again altered the terrain on which employment relations develop. Government has attempted to balance flexibility with fairness, preserving light-touch regulation whilst introducing rights to minimum wages and to employee representation in the workplace. Yet this is an open economy, conditioned significantly by developing patterns of international trade and by European Union policy initiatives. This interaction of domestic and cross-national influences in analysis of changes in employment relations runs throughout the volume.

*Pussy's in the Well* International Labour Organization  
 Planted forests - despite being only seven per cent of the world's forest resources, have superseded naturally regenerating forests as the principal source of industrial wood products. Lessening the pressure for wood production, on natural forests, tree planting has released them to be managed for other purposes - carbon sinks, soil and water protection, conservation of biological diversity, recreation and amenity. Representing a complement, but not an alternative, to natural forests, planted forests have become increasingly important for reducing worldwide deforestation, loss of forest ecosystems and forest degradation. Examining the significance of this rapidly emerging world resource, chapters consider the strengths and weaknesses of planted forests, management objectives for their use and aspects of ownership and policy. Data from key production countries are used to evaluate the implications and sustainability of planted forests as a source of forest products as well as social and ecological issues.

**History of Iban Settlements Around Kuching City, Sarawak** International Labour Organization  
 Leading sociologists outline the historical development of the discipline in Britain and document its continuing influence in this essential and comprehensive reference work. Spanning the Scottish enlightenment of the 18th century to the present day this Handbook maps the discipline and the British contribution.

This volume presents a scholarly insider's perspective on the Asian economic crisis, examining the social, economic and political consequences of the crisis in six influential Asian economies: Indonesia, Korea, Malaysia, the Philippines, Taiwan and Thailand. Each chapter contains an analysis of the events leading up to and during the crisis, the social impacts and an assessment of possible futures for these countries. The contributors expertise and use of up-to-date data ensures an integrated approach by which the process of economic change can be understood. The book reveals that professional workers in the urban financial sector, as well as manual labourers in the export sector, felt the most dramatic effects. Impacts on the latter group resulted in a significant rise in the population living below the poverty line. The book emphasises the previous absence of strong social security 'nets' and the need to strengthen macroeconomic policies and institutional, legal, regulatory and supervisory structures. Other topics covered include intractable government corruption and fiscal management.

**The Greek Philosophers** Routledge

In *Freedom, Equality and Justice in Islam*, M H Kamali presents the reader with an analysis of the three concepts of freedom, equality and justice from an Islamic point of view and their manifestations in the religious, social, legal and political fields. The author discusses the evidence to be found for these concepts in the Qur'an and Sunna, and reviews the interpretations of the earlier schools of law. The work also looks at more recent contributions by Muslim jurists who have advanced fresh interpretations of freedom, equality and justice in the light of the changing realities of contemporary Muslim societies. *Freedom, Equality and Justice in Islam* is part of a series dedicated to the fundamental rights and liberties in Islam and should be read in conjunction with *The Dignity of Man: An Islamic Perspective and Freedom of Expression in Islam*.

*Trade Unions and Workplace Training* examines the changing role of trade unions in the provision of vocational education, workplace training and skill development. It reflects upon: the role that unions have played in the reform of vocational education and training systems; the nature of union involvement in consultative mechanisms at a national and industry level; the nature of union involvement in skill formation at the workplace; and the development of mechanisms for the articulation of employee voice in the design, delivery and assessment of vocational training. The book provides a collection of studies of Canada, Australia, United States, United Kingdom, France, Germany and Norway by leading researchers in the field. Distinctive, accessible and original, all the chapters are written in a style that illustrates the relevance of academic debates and research data to practice and the book includes a number of the chapters written by trade union practitioners.

W.K.C. Guthrie has written a survey of the great age of Greek philosophy - from Thales to Aristotle - which combines comprehensiveness with brevity. Without pre-supposing a knowledge of Greek or the Classics, he sets out to explain the ideas of Plato and Aristotle in the light of their predecessors rather than their successors, and to describe the characteristic features of the Greek way of thinking and outlook on the world. Thus *The Greek Philosophers* provides excellent background material for the general reader - as well as providing a firm basis for specialist studies.

Success in collective bargaining calls for knowledge and skill in several basic areas. How should a claim be presented to an employer? What arguments should be used? How is bargaining conducted? What is the role of the State? What are the rights to which a worker is entitled, in terms of

international labour standards? These are among the questions answered in this manual, which belongs to a series designed to be as effective as possible in the defence and advancement of workers' interests. References to individual international labour Conventions and Recommendations (partly reproduced in an a.
