Based on research presented at The Harvard Business School's first-ever conference on business approaches to poverty alleviation, Business Solutions for the

Global Poor brings together perspectives from leading academics and corporate, non-profit and public sector managers. The contributors draw on practical and dynamic how-to insights from leading BOP ventures from more than twenty countries world-wide. This important volume reflects poverty's multi-faceted nature and a broad range of actors—multinational and local businesses, entrepreneurs, civil society organizations and governments—that play a role in its alleviation.

### Small States, Smart Solutions

Birds of Aruba, Bonaire, and Curaçao is the essential guide for anyone traveling to those islands. It showcases the more

than 280 species seen on Aruba, Bonaire, and Curaçao and provides descriptions of and directions to the best places to bird, from the famous white sand beaches to hidden watering holes to the majestic national parks. Aruba, Bonaire, and Curaçao—the "ABCs"—located in the southwestern Caribbean,

not far from Venezuela, share fascinating ecological features with the West Indies as well as the South American mainland, making birding on the islands unique. The identification portion of the book features endemic subspecies such as the Brown-throated Parakeet; a wide variety of wintering North American migrants; spectacular restricted-range northern South American species such as the Yellow-shouldered Parrot, Bare-eyed Pigeon, Troupial, Ruby-topaz Hummingbird, and Yellow Oriole; and West Indian species including the Pearly-eyed Thrasher and Caribbean Elaenia. Colorful introductory sections provide readers with a brief natural history of the islands, detailing the geography, geology, and general ecology of each. In the site guide that follows, Jeffrey V. Wells and Allison Childs Wells share their more than two decades of experience in the region, providing directions to the best birding spots. Clear, easy-to-read maps accompany each site description, along with

notes about the species that birders are likely to find. The identification section is arranged in classic field guide format and offers vivid descriptions of each bird, along with tips on how to identify them by sight and sound. The accounts also include current status and seasonality, if relevant, and common names in English, Dutch, and Papiamentu, often inspired by the unique voices of the birds, such as the "chibichibi" (Bananaquit) and "choco" (Burrowing Owl). The accompanying color plates feature the beautiful work of illustrator Robert Dean. The final section, on conservation, raises awareness about threats facing the birds and the habitats on which they rely and summarizes conservation initiatives and needs, offering recommendations for each island.

**Concepts, Methodologies, Tools, and Applications** World Bank Publications

Over 350 million people are affected each year by disaster and conflict. The international community is often unable to respond effectively to these crises. This report provides an independent examination

of donor performance with the aim of improving the effectiveness of aid, and promoting greater accountability of donors. *Internet Gambling Offshore* Springer Exploring the intersections of digital humanities and African diaspora studies How can scholars use digital tools to better understand the African diaspora across time, space, and disciplines? And how can African diaspora studies inform the practices of digital humanities? These questions are at the heart of this timely collection of essays about the relationship between digital humanities and Black Atlantic studies, offering critical insights into race, migration, media, and scholarly knowledge production. The Digital Black Atlantic spans the African diaspora's range—from Africa to North America, Europe, and the Caribbean—while its essayists span academic fields—from history and literary studies to musicology, game studies, and library and information studies. This transnational and interdisciplinary breadth is complemented by essays that focus on specific sites and digital

humanities projects throughout the Black Atlantic. Covering key debates, *The Digital Black Atlantic* asks theoretical and practical questions about the ways that researchers and teachers of the African diaspora negotiate digital methods to explore a broad range of cultural forms including social media, open access libraries, digital music production, and video games. The volume further highlights contributions of African diaspora studies to digital humanities, such as politics and representation, power and authorship, the ephemerality of memory, and the vestiges of colonialist ideologies. Grounded in contemporary theory and praxis, *The Digital Black Atlantic* puts the digital humanities into conversation with African diaspora studies in crucial ways that advance both. **Democracy and New Media** Springer  
This book offers a problem-and-solution approach to environmental remediation in mining, including the environmentally sustainable utilization of waste materials from the mining industry. It largely comprises articles published in Springer journals, which have been

thoroughly revised and expanded. With supplementary data and illustrations, it discusses specific problem areas in relevant Caribbean locations and provides an overview of geotechnical and microbial solutions to prevent post-mining deterioration in this area.

**Social Media, Crisis Communication, and Emergency Management** MIT Press  
This book provides sound conceptual understanding of the current approach to management and decision making regarding geo-based challenges in developing countries that tend to suffer from information poverty and subjectivity and are reactive. The book also provides the necessary technical tools to energize research thinking and develop locally driven practical and sustainable solutions, ultimately moving management and decision making from being reactive to being proactive. This book fills a void as there are no published books to show the way forward or to present real case studies for this purpose. Case studies that utilize new technologies and scientific thinking are presented for developing sustainable management options

based either on producing local applied research or on utilising relevant international research. These case studies are based on the author's first-hand experiences in arid/semi-arid (Iraq, Tunisia, Morocco and Jordan), temperate (UK) and tropical environments (Malaysia, the Caribbean region, Indonesia and Australia).

**Technology Adoption in the Caribbean Tourism Industry** World Bank Publications  
The fifth Small Wars Journal/El Centro anthology spans online journal and blog writings for all of 2015 with a thematic focus on narcoterrorism and impunity in the Americas. This anthology is composed of an About SWJ and Foundation section; a memorial to our friend and colleague, George W. Grayson; an acronym listing; a foreword; an introduction; twenty-eight chapters; a postscript; anthology notes; and notes on its twenty-three academic, governmental, and professional contributors.

**Narcoterrorism and Impunity in the Americas** A&C Black  
In the aftermath of the financial crisis, Cooper locates the WTO-focused

struggle between the US and the very small island state of Antigua on Internet gambling in the wider International Political Economy. He draws connections between gambling and offshore and/or enclave cultures and points out the stigmatization of 'Casino Capitalism'.

**ICT-Supported Innovations in Small Countries and Developing Regions**

Springer

Commonwealth Caribbean Business Law breaks away from the traditional English approach of treating business law primarily as the law of contract and agency. It provides a broad overview of the foundation of various legal systems and goes on to examine the various areas of legal liability that may impact on business activities. These areas include tort law, criminal law, internet law and payment in business transactions. Specifically, the book targets the development of business law in several Commonwealth jurisdictions, including Canada and Australia, but with special focus on legal developments in Commonwealth Caribbean countries. The approach of the book is to present

excerpts from judgments, so as to enable students to understand legal principles as espoused by the judiciary without the filtering bias of authors. This new title is essential reading for students taking the LLB and Business Degree courses in the Caribbean and other commonwealth jurisdictions.

**Guidance on spatial technologies for disaster risk management in aquaculture**

Springer

The Handbook of Feminist Family Studies presents the important theories, methodologies, and practices in feminist family studies. The editors showcase feminist family scholarship, providing both a retrospective and a prospective overview of the field and creating a scholarly forum for interpretation and dissemination of feminist work.

*Birds of Aruba, Bonaire, and Curacao* IGI Global  
Small states face special hurdles in achieving development gains. These states spend significantly more of their GDP on producing public goods and services, and they face higher connectivity costs than do their larger brethren. *Small States, Smart Solutions* examines

how some small states use international trade and telecommunications technology to outsource services such as justice, banking supervision, public utilities regulation, high-quality medicine, and education. Sourcing these services internationally poses unique challenges but also opens broad opportunities. The eight case studies in this book, based on interviews with government officers and citizens, describe pioneering initiatives undertaken by some small states to better the quality of life of their citizens.

**Bridging the Digital Divide? Prospects for Caribbean**

**Development in the New Techno-economic Paradigm** eBooks2go

This book offers a comprehensive introduction to law and policy responses to contemporary problems in Latin America, such as human rights violations, regulatory dilemmas, economic inequality, and access to knowledge and medicine. It includes 19 chapters written by sociologists, lawyers, and political scientists on the transformations of courts, institutions and rights protection in Latin

America, all of which stem from presentations at conferences in Oxford and UCL organised by the editors. The contributors present original analyses based on rigorous research, innovative case-studies, and interdisciplinary perspectives, all written in an accessible style. Topics include the Inter-American Court of Human Rights, institutional design, financial regulation, competition, discrimination, gender quotas, police violence, orphan works, healthcare, and environmental protection, among others. The book will be of interest to students and scholars interested in policymaking, public law, and development.

*EPA 200-B*. John Wiley & Sons

Cyber security has become a topic of concern over the past decade as private industry, public administration, commerce, and communication have gained a greater online presence. As many individual and organizational activities continue to evolve in the digital sphere, new vulnerabilities arise. *Cyber Security and Threats: Concepts, Methodologies, Tools, and*

*Applications* contains a compendium of the latest academic material on new methodologies and applications in the areas of digital security and threats. Including innovative studies on cloud security, online threat protection, and cryptography, this multi-volume book is an ideal source for IT specialists, administrators, researchers, and students interested in uncovering new ways to thwart cyber breaches and protect sensitive digital information.

*A handbook* Springer This book investigates the adoption of Information and Communication Technologies (ICTs) in Caribbean travel firms, particularly for sales and marketing purposes. By examining the decision-making process in tourism companies deciding whether to become more dependent on digital capabilities and artificial intelligence, this text seeks to understand the role of strategy and resources in technology adoption. Further, the author assesses the role of factors both external (such as culture) and internal (such as leadership) in this strategic process. *Economies in the*

Caribbean are reliant on tourism to bring prosperity to the region, and with the onset of the COVID-19 pandemic, the industry is being forced to transform the way it operates. With implications for those studying organizational behavior as well as strategic and tourism management, this study analyzes rapid change in this pivotal industry.

*Human Rights Internet Reporter* CRC Press

Information communications technologies (ICTs) are generally viewed as the new vehicle to redress developmental problems. The book assesses the value of such claims by analyzing the structure and workings of the global political economy (GPE) and its impact on, and prospects for developing countries in the current techno-economic context. The book uses a case study of the Caribbean to illustrate the challenges and opportunities faced by small-island developing states (SIDS) in the new techno-economic paradigm. The question must be asked, can small island developing states such as those of the Caribbean leverage modern ICTs for growth and development

against the backdrop of a yawning global digital divide? Hence, the book addresses the central problem of the digital divide and whether emerging ICTs offer any real economic opportunities for the Caribbean region.

Frontiers Media SA  
This book deals with the crises and emergencies that a teacher may have to deal with in the classroom, as well as problems in interpersonal relationships with students, interns, parent and peers. Each chapter deals with different facets of problems that may arise in the classroom, illustrated by case studies that typify the situation under discussion. For each case study, questions about the solution portrayed and

several other possible ways of dealing with the problem or crises are presented, followed by a statement summarizing good teaching practice. (JD)
