***** Barn The Spoon is a rare master craftsman in the art of spoon carving. In this book he generously shares his extraordinary skill, gentle philosophy and his life's work - designing and carving beautiful spoons that are both a joy to use and hold. The simple, ordinary spoon is part of our everyday lives, intimately entwined with the acts of eating and socialising, from stirring our first cup of coffee to scraping the last bit of pudding from the bowl. Barn's spoons will take you on a journey into the new wood culture, from understanding the relationship between wood, the raw material and its majestic origins in our trees and woodland, to the workshop and the axe block, and into your own kitchen. Showing you how to use the axe and knife, from how they should feel in your hand to honing the perfect edge when carving your own spoons, the book features sixteen unique designs in the four main categories of spoon - eating, serving, cooking and measuring spoons, Barn takes you through the nuances of their making, how each design is informed by its

function at the table or in the kitchen, and the key skills you will learn - such as creating octagonal handles, manipulating grain patterns and mastering bent branches. With a chapter on the tools and basic techniques, four more chapters on different styles of spoons, and beautiful photography, there's plenty to keep the beginner or professional busy.

Sound, technical advice is the first order of business in this collection of several excellent articles and 24 projects from Woodcarving magazine. Far from being just a selection of patterns, this guide reviews the fundamentals of the craft and is addressed to carvers of all skill levels. Special attention is paid to the finicky V-tool, which suffers from a reputation for being difficult to use, and carvers are also instructed on how to sharpen tools properly, choose the perfect wood, apply a variety of finishes, and work with gold leaf. The projects include pineapple finials, decorative moldings, and signs with carved lettering; challenging advanced work is to be found in plans for an eagle-decorated lectern and a seated Buddha. Color photos illustrate the step-by-step directions for all projects, and sidebars offer tips for success. Chris Pye is a professional woodcarver and a member of the Master Carvers Association. He is the author of Elements of Woodcarving and Woodcarving: Tools, Materials & Equipment.
