The Success Guide to Growing Marijuana Indoor For Dummies

Use the perfect method for growing the small amounts of marijuana needed for medical use, easily, organically, and year-round, with a simple hydroponic system. Most people who are interested in growing medical marijuana at home aren't experienced in growing marijuana; they've just found themselves in a medical situation where it can help. The most efficient and intensive method of cultivating marijuana, especially on the small-scale grower level, is by hydroponic gardening. Also, hydroponic methods lend themselves easily to organic standards and rarely require pesticides. With step-by-step instructions and photos, hydroponics and marijuana-growing expert Joshua Sheets shows how to create, build, maintain, and harvest a hydroponic marijuana garden. He even includes information on the best nutrient solutions and breeding plants. Over 25 million Americans are potentially eligible to use medical marijuana based on their diagnoses, yet fewer than 800,000 currently do. As more eligible patients opt for alternative treatment options such as marijuana, a rising amount of medical marijuana will need to be produced to keep up with demand. Most states that permit medical marijuana growing allow the license-holder to grow a certain number of plants for home or medical use. Whether you use marijuana to aid health, especially to alleviate the effects of chemotherapy and other drugs, or, in states where it is legal, as a recreational drug similar to alcohol, Homegrown Marijuana is the perfect book to take control of your own production.

180+ Entry Daily Hydroponic Marijuana Growing Journal Use the journal to track Air Temperature, Humidity, Water Temp, Water Reservoir Level, Nutrient Solution pH, TDS PPM, Root Health, Leaf Health, "Fruit" Health and take any additional notes you may need. The secret to getting the best results from hydroponic gardening is that you must document every change you make no matter how big or small; this is especially true for beginners. It is recommended that you fill out the logbook each day. You should also note the readings from your pH tester and EC meter.

Document changes like if you added pH Up or Down. It doesn't matter if you are growing vegetables like lettuce or tomatoes at home or if you are growing cannabis professionally; taking good notes of how you manage your hydroponics system is the key to figuring out if any changes you make are good or bad for your setup.
