This book focuses on the lexical borrowing between English and Arabic, and offers historical background regarding the contact between these two languages. It sheds light on why and how both languages have come in contact, showing how the hegemony of the English language can be clearly seen in its impact on Arabic. Simultaneously, the text describes the role that Arabic played in shaping and enriching English in its early phase.

English-Arabic bilingual medical glossary:This glossary contains 2,100 words and definitions. A team of bilingual professionals translated the English

terms to the target language. The first draft was reviewed by physicians and community members for accuracy and usability. The second draft

incorporated all changes and was then back translated to ensure clarity. The final document was created based on these processes. The glossary

does not include all linguistic and dialectical variations of the target language but is based on the more commonly used form of the language.

Abstracts of I International Scientific and Practical Conference

*Medical Terms Dictionary* John Benjamins Publishing Company

Arabic is a language of substantial cultural and religious importance. It is spoken by about 300 million people, predominantly in the 22 countries of

the Arab world, as well as in several other regions where the Arab diaspora has settled. Arabic is also the language of Islam and underpins the religious practice of about 1.5 billion Muslims worldwide. In view of the above, the authors thought it important to create an easily accessible handbook for interpreters, translators, educators and other practitioners working between Arabic and English in healthcare settings. Introduction to Healthcare for Arabic-speaking Interpreters and Translators follows the seminal publication Introduction to Healthcare for Interpreters and Translators (Crezee, 2013) and has been supplemented with Arabic glossaries and comments about health communication between Anglophones and Arabic speakers. This practical resource book will help inform interpreters and translators about healthcare settings, anatomy, physiology, medical terminology and frequently encountered conditions, diagnostic tests and treatment options. Arabic is divided into two categories: formal (Classical, Standard or literary) Arabic, and local dialects (colloquial Arabic). Formal Arabic is the official language of all Arab countries. In each of these, there are regional dialects which color formal Arabic and add character to a poetic and expressive language. Poetic nature is found in many daily expressions, and not only in Arabic literature, for example, "Good morning" in Arabic is "Ssabah al khair", which in essence wishes others a morning of goodness; and, the pan-Arab greeting "Salam Alaykum", which literally means "may peace be upon you". Dialects once existed principally in spoken form but these days they are increasingly used in writing in social media and its paraphernalia (mobile phones, tablets, etc.). In this book, formal Arabic is used in the glossaries, simply because it is the recognized language of literacy across the Arabic-speaking world.

Miftah Al-Tibb Wa-Minhaj Al-Tullab Springer Nature

The contributors to "Translation and Medicine" address several broad aspects of medical translation, from the cultural/historic framework of the language of medicine to pragmatic considerations of register and terminology. Their articles highlight some of the contributions translation has made to medical science and addresses some of the questions raised by those who escort the advances of medicine across language and cultural barriers and those who train the next generation of medical translators. Section 1 covers some Historical and Cultural Aspects that have characterized the language of medicine in Japan and Western Europe, with special emphasis on French and Spanish; Section 2 opens some vistas on The Medical Translator in Training with two specific university-level programs in Switzerland and in Spain, as well as an in-depth analysis of who makes the better medical translator: the medically knowledgeable linguist or the linguistically knowledgeable medical professional; and Section 3 looks at several facets of The Translator at Work, with discussions of the translator-client relationship and the art of audience-specific translating, an insider's view of the Translation Unit of the National Institutes of Health, and a detailed study of online medical terminology resources.

Biomedical engineering is one of the most prominent and rapidly developing engineering fields. It is a discipline that is involved in the development of devices, algorithms, processes, procedures and systems to enhance and improve the medical field. Biomedical engineering has multiple areas of specialization that include: biomechanics, biomaterials, tissue engineering, imaging, and bioinstrumentation. This book serves as a guide to students and professionals seeking to understand commonly used technical terms and phrases in the biomedical engineering field. The content is specifically designed to define technical terms in a general context to facilitate an overall understanding. The author begins by translating terms in English to Arabic then Arabic to English. This text can be used as a tool in the academic or professional environment for both English speaking and non-English speaking individuals alike.

*Translation and Medicine* Routledge

This book - now available in paperback - was originally written in the early 11th century by Abu al-Faraj 'Ali ibn al-Husayn ibn Hindu (d. 423/1032), a physician who was also the author of a treatise on philosophy, and who was famous for his Arabic poetry (his anthology is said to have amounted to 15,000 couplets or more). For a medieval work, which was written as an introduction to medicine intended for students, the book is refreshingly meticulous in its analysis and is modern in its outlook. It discusses the various disciplines that a medical student should have been familiar with, including a lengthy digression into philosophy and logic. It then deals with matters specifically medical, devoting separate sections to anatomy, diseases, pulse, and names of medicinal substances.

Thinking Arabic Translation is a comprehensive and practical 24-week course in translation method. Adapted from the successful French-based Thinking Translation (1992) it has been successfully piloted at Durham University. Clear explanations, discussion, examples and exercises enable students to acquire the skills necessary for tackling a broad range of translation problems. Examples are drawn from a variety of sources, including journalism and politics, legal and technical texts and literary and consumer-orientated texts. This Tutor's Handbook complements the Thinking Arabic Translation Coursebook for students. It provides invaluable guidance on using the course and includes specimen answers and photocopyable class handouts.

Medical Arabic is a valuable resource for students interested in learning medical Arabic at ACTFL level Advanced Low. Effective communication is essential in health care, and communication is most effective when both parties share a common language, therefore resulting in a comfortable relationship between health care provider and patient. This textbook is intended for those with prior knowledge of Arabic language and grammar. It is designed to provide students with the linguistic and cultural competencies and medical Arabic terminology necessary to communicate in medical settings such as a hospital, clinic, or a community health care facility. Students will be able to ask questions in Arabic and provide answers in common medical situations, conduct patient interviews, and understand a wider variety of possible responses from patients. The book provides clear explanations of medical vocabulary and concepts as they occur in the reading materials to encourage active interaction with the text. The book's drills are designed as either in-class exercises or homework. The answer key for the book exercises is also provided as a downloadable e-resource. Written by dynamic authors who taught Arabic as a foreign language for several years and reviewed by physicians and professionals in the field, the book is an essential guide for students in medical school, biology, and other science majors. Students will find Medical Arabic more than merely a textbook but rather a pathway to enhance their communication skills effectively.

Hitti's Medical Dictionary Crossroads - History of Intera

Arabic-English-Arabic Legal Translation provides a groundbreaking investigation of the issues found in legal translation between Arabic and English. Drawing on a contrastive-comparative approach, it analyses parallel authentic legal documents in both Arabic and English to examine the features of legal discourse in both languages and uncover the different translation techniques used. In so doing, it addresses the following questions: What are the features of English and Arabic legal texts? What are the similarities and differences of English and Arabic legal texts? What are the difficult areas of legal translation between English and Arabic legal texts? What are the techniques for translating these difficult areas on the lexical and syntactic levels? Features include: A thorough description of the features of legal translation in both English and Arabic, drawing on empirical new research, corpus data analysis and strategic two-way comparisons between source texts and target texts Coverage of a broad range of topics including an outline of the chosen framework for data analysis, a historical survey of legal discourse developments in both Arabic and English and detailed analyses of legal literature at both the lexical and syntactic levels Attention to common areas of difficulty such as Shariah Law terms, archaic terms and model auxiliaries Many examples and excerpts from a wide selection of authentic legal documents, reinforced by practical discussion points, exercises and practice drills to encourage active engagement with the material and opportunities for hands-on learning. Wide-ranging, scholarly and thought-provoking, this will be a valuable resource for advanced undergraduates and postgraduates on Arabic, Translation Studies and Comparative Linguistics courses. It will also be essential reading for translation professionals and researchers working in the field.

*Thinking Arabic Translation* Dar Al Kotob Al Ilmiyah دار الكتب العلمية

A Dictionary of Moroccan Arabic presents, in a range, the core vocabulary of everyday life in Morocco - from the kitchen to the mosque, from the hardware store to the natural world of plants and animals. It contains myriad examples of usage, including formulaic phrases and idiomatic expressions. Understandable throughout the nation, it is based primarily on the standard dialect of educated Moroccans from the cities of Fez, Rabat, and Casablanca. All Arabic citations are in an English transcription, making it invaluable to English-speaking non-Arabists, travelers, and tourists - as well as being an important resource tool for students and scholars in the Arabic language-learning field.
