A New Approach to Building Expertise and Confidence as an Online Educator IGI Global

This new edition of Friedman's landmark book explains the flattening of the world better than ever- and takes a new measure of the effects of this change on each of us.

High-Impact Practices in Online Education John Wiley & Sons
Written by Matthew Reed, the formerly anonymous author of InsideHigher Ed's most popular blog, Confessions of a Community CollegeDean, this book offers keen insights, a frank discussion, and suggested solutions for the many issues that are unique to community college administration. In Confessions of a Community College Administrator Reed describes the current

landscape of community college leadership and addresses some of the fundamental questions that face community colleges. Who does a community college actually serve? How do administrators really make budget decisions? Where do the roots of the "permanent crisis" in higher education lie? How are full-time and adjunct faculty best balanced? Throughout the book, Reed offers guidance and encouragement for the next generation of community college leaders. He examines a set of proposed solutions from outside academia, then turns to other solutions emerging from inside the community college world that also show potential for success. *Confessions of a Community College Administrator* is filled with realistic, and ultimately hopeful, advice on how to step back from the day-to-day administrative struggles and gain some perspective on the larger picture. Reed offers administrators useful and productive directions for constructive change.

This study explores how public schools in Michigan are meeting the mandate to provide online learning opportunities as a condition of graduation. Michigan became the first state in the nation to mandate online learning opportunities as a condition for graduation with the passage of the Michigan Merit Curriculum. Although the mandate for compliance has been in effect since the 2010-2011 school year, there has been no systemic exploration as to how the mandate is affecting students, teachers, schools and systems. This quantitative study surveyed administrators from all public traditional and charter high school programs across the state of Michigan. Using documents provided by the State of Michigan, questions were formulated to provide the basis for a researcher developed survey. Utilizing descriptive and inferential statistics, I concluded that a greater percentage of students enrolled in Online Experiences Incorporated within Classes than in Fully Online Semester Long Courses, with both options being incorporated more into content academic areas than non-core academic areas. Smaller enrollment schools utilized on line opportunities at a higher rate than do their peers in larger schools. Online Educational Opportunities are most often used as a vehicle for student skillset improvement: to help

students with credit recovery needs, to help students considered at-risk for school failure, and to assist students in gaining 21st Century skills. Student and administrator technological training, as well as providing online experiences within existing classes both significantly predicted improvement in student access to curriculum. Providing Fully Online Courses to students significantly predicted improvement in the school programs financial and perceived achievement measures. Commercial vendors were the largest provider of content for Fully Online Semester Long Course content. Districts tend to stay within their own organizations for support for their Online Educational Opportunities. Decision makers tended to be influence mostly by their building administrators, followed by their district administrators on the types of opportunities being offered. It was also found that significant differences based upon district enrollment size existed throughout the state.

Elements of Quality Online Education Stylus Publishing, LLC Online education, both by for-profit institutions and within traditional universities, has seen recent tremendous growth and appeal - but online education has many aspects that are not well understood. The SAGE Encyclopedia of Online Education provides a thorough and engaging reference on all aspects of this field, from the theoretical dimensions of teaching online to the technological aspects of implementing online courses—with a central focus on the effective education of students. Key topics explored through over 350 entries include: · Technology used in the online classroom · Institutions that have contributed to the growth of online education · Pedagogical basis and strategies of online education · Effectiveness and assessment · Different types

of online education and best practices · The changing role of online education in the global education system
Best Practices of Online Education Springer Publishing Company Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits - - be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

In "Online Education: Global Questions, Local Answers", 24 college educators focus on the most important questions to be addressed by all scholar-teachers and administrators committed

to developing high-quality online education programs. We describe these questions as "global" because they transcend the particular situations of individual institutions. They are questions that everyone involved in online education needs to address: What are the issues to consider when first developing and then sustaining an online education program? How do we create interactive, pedagogically sound online courses and classroom communities? How should we monitor and assess the quality of online courses and programs? And how should recent developments and innovations in online education cause us to reexamine our roles and responsibilities as educators in technical communication? While these global questions affect all of us in one way or another, they demand different local answers, such as those presented by the contributors to this text. Readers will need to consider which of these local answers might apply to their own situations and how these answers might need to be adapted to reflect the particular needs of their own institutions.

The Disruptive Power of Online Education Canon Press & Book Service

This is a reprint of a text originally published in 1986 by Technomic Publishing Co, Inc. The authors base the book on their personal experiences as public school administrators in the U.S. They address many aspects of the political arena of educational administration and leadership which are not typically covered in

university courses, but are necessary for the survival of classroom teachers who later become administrators. Written in a down-to-earth style, the authors are frank in their assessment of the educational system. For students in educational administration courses and practicing school administrators.

School Administrator's Complete Letter Book IAP

Online teaching and learning has surged in recent years, and faculty who normally teach in face-to-face settings are increasingly called upon to teach blended, hybrid, and fully online courses. Best Practices in Online Teaching and Learning across Academic Disciplines provides insights from experienced university teachers and scholars across multiple disciplines—including social sciences, humanities, natural sciences, mathematics, and professional programs such as nursing, education, and business administration—who share innovative practices, pedagogies, and instructional design techniques. This work highlights and features effective, practical, innovative, and engaging best-practices and approaches in online teaching and instructional design that can assist university faculty members and teachers, course designers and developers, and administrators invested and involved in online education. Using a common theme and structure, each chapter is co-authored by faculty members possessing a wealth of experience and credentialing in online teaching and instructional design in the relevant discipline or sub-discipline. Chapters include best-practices, approaches, and techniques within the discipline as well as relevant, innovative, and specific tools and strategies that improve student engagement and outcomes. The book will

appeal to faculty members and administrators in higher education teaching or designing online courses or entire online curricula, as well as instructional design staff working with and training faculty. Readers will be especially interested to discover lessons about how contributors have successfully taught and designed courses in disciplines not typically associated with online learning, such as mathematics, composition/writing, drawing, "hard" sciences, and speech, among others. This volume offers the first comprehensive guide to how high-impact practices (HIPs) are being implemented in online environments and how they can be adjusted to meet the needs of online learners. This multi-disciplinary approach will assist faculty and administrators to effectively implement HIPs in distance education courses and online programs. With a chapter devoted to each of the eleven HIPs, this collection offers guidance that takes into account the differences between e-learners and traditional on-campus students. A primary goal of High-Impact Practices Online is to share the ways in which HIPs may need to be amended to meet the needs of online learners. Through specific examples and practical suggestions in each chapter,

readers are introduced to concrete strategies for transitioning HIPs to the online environment that can be utilized across a range of disciplines and institution types. Each chapter of High-Impact Practices Online also references the most recent and relevant literature on each HIP so that readers are brought up to date on what makes online HIPs successful. The book provides guidance on how best to implement HIPs to increase retention and completion for online learners.
