PATEL MARQUIS

Context and Perspectives Routledge

This open access book brings together narratives of inbound and outbound expatriate entrepreneurship in Japan to provide a comprehensive overview of international entrepreneurship in the region. Through in-depth interviews with expatriate entrepreneurs, policymakers, and additional stakeholders it provides the reader with a solid understanding of the

current landscape of international entrepreneurship as it relates to Japan and the challenges for policymakers. The topics addressed in this book include definitions of expatriate entrepreneurship, entrepreneurship policy development and implementation, concepts of mindset, cultural brokerage, community, and identity as they relate to Japanese self-initiated expatriate entrepreneurs working in South East Asia and to non-Japanese self-initiated expatriate entrepreneurs working in Japan. Additionally, the book provides an overview of issues connected to regional development and economic

growth in Asia. Illustrated through carefully chosen cases from Japan, Myanmar, Thailand, Cambodia, Vietnam, and Indonesia and developed by connecting these cases to policy and interdisciplinary studies, this book is highly recommended to scholars, policymakers and practitioners who seek an in-depth and up-to-date integrated overview of the field of expatriate entrepreneurship in Asia.

Research, Principles, and Practice

Routledge

Transgenerational entrepreneurship, as a discipline, examines the processes,

resources and capabilities that allow family enterprises to create social and economic value over time in order to succeed beyond the first generation of business owners. While tangible resources such as financial and physical capital are certainly important factors in the long-term success of a family-run business, this book focuses specifically on the role of intangible resources and capabilities, which are less easily quantifiable but equally vital.

Entrepreneurial Action Edward Elgar Publishing

This book is open access under a CC BY 4.0 license. In this book, the authors present a challenge for future research to build a stronger, more complete understanding of entrepreneurial phenomena. They argue that this more complete picture of entrepreneurial phenomena will likely come from scholars who undertake at least some trailblazing projects; from scholars who broaden the range of research questions, the potential outcomes of entrepreneurial action, and the selection and combination of research methods; and from researchers who avoid the endless debates about the margins of

the field and its sub-fields or about whether one theoretical or philosophical lens is superior to another. This book offers suggestions for future research through a variety of topics including prosocial action, innovation, family business, sustainability and development, and the financial, social, and psychological costs of failure. It promises to make an important contribution to the development of the field and help academics, organizations, and society make useful contributions to the generation of entrepreneurial research.

Cultural Entrepreneurship in Theory, Pedagogy and Practice Emerald Group Publishing

A detailed and critical analysis of the multiple types of entrepreneurship, helping students to understand the practical skills and theoretical concepts needed to create their very own entrepreneurial venture. Split into two parts, the book provides an even balance between theory and practice. Part 1 covers the practical activities involved in new entrepreneurial ventures, and Part 2 uses the latest research to explore entrepreneurship from different

perspectives. The expanded third edition of Exploring Entrepreneurship includes: • Additional coverage of entrepreneurship and the United Nations Sustainable Development Goals (SDGs), corporate entrepreneurship, variety and diversity in entrepreneurship, and entrepreneurial approaches to the delivery of public services • New and updated Case Studies that tackle cutting-edge practical issues • New and updated Researcher Profiles from leading international scholars • Enhanced Recommended Reading sections in each chapter with concise introductions to the latest research findings Essential online resources for students, including selected SAGE journal articles, pre-reading suggestions, self-assessment questions and revision tips, plus a range of lecturer resources, are available. Suitable reading for students taking modules in Entrepreneurship or Small Business Management at upper undergraduate and postgraduate levels.

Transgenerational Entrepreneurship
Routledge

Given the compelling need to understand how entrepreneurship can support the Sustainable Development Goals (SDGs)

and be appropriately guided, this book explores how entrepreneurial thinking and action can support social change, and investigates alternative entrepreneurship approaches by drawing together different studies.

Classroom Exercises for Entrepreneurship
Emerald Group Publishing

This book is not available as a print inspection copy. To download an e-version click [here](#) or for more information contact your local sales representative. A detailed and critical analysis of the multiple types of entrepreneurship, helping students to understand the practical skills and theoretical concepts needed to create their very own entrepreneurial venture. Split into two parts, the book provides an even balance between theory and practice. Part 1 covers the practical activities involved in new entrepreneurial ventures, and Part 2 uses the latest research to explore entrepreneurship from different perspectives. The second edition features a new author, Catherine Wang, who brings specialist knowledge in entrepreneurial learning, ethnic minority entrepreneurship and international entrepreneurship. There are new chapters

on the Varieties of Entrepreneurship, including social entrepreneurship (not-for-profit) and Intrapreneurship (employees within organizations) and Entrepreneurial Learning, which explores how entrepreneurs hone and develop their thinking. There is also a collection of new international case studies, including Dyson, Facebook, Made.com, and examples of entrepreneurship in China and Ghana. The book is complemented by a companion website featuring online resources for instructors and students, including PowerPoint Slides, additional mini case studies, multiple choice questions, video links, and revision tips. Suitable reading for students taking modules in Entrepreneurship or New venture creation at upper undergraduate and postgraduate levels.

Exploring Transgenerational Entrepreneurship Routledge

Entrepreneurship is a creative act with entrepreneurs creating products, services, jobs, economic stimulation, culture and more. This creatively written book offers a wide array of exercises of varied time requirements for implementation, as well as a complexity of content. In addition to

more traditional topics, the book serves to enhance students' imaginative and creative abilities so they can effectively problem-solve and build their creative entrepreneurial visions. Learning objectives can be directly implemented into syllabi.

New Perspectives, Practices, and Policies
Taylor & Francis

This book presents the current state-of-the-art in all major and upcoming areas of entrepreneurship research. Thousands of scholars around the world are currently working to broaden our understanding of the entrepreneurial phenomenon. The disciplines involved are numerous, as are the topics of interest, with substantial efforts to enhance the existing knowledge. This book is specifically designed to facilitate high-level, high-intensity discussions and fruitful exchanges between scholars involved in entrepreneurship research. The articles address a variety of topics ranging from self-employment, technology, growth patterns and job creation, and success and failure rates, to historical, conceptual and comparative international approaches. "This book takes entrepreneurship beyond

the individual, size of the venture, entrepreneurial personality, and looks at entrepreneurship as a long term complex process that is heterogeneous, content dependent with an emphasis on innovation and growth. A must read for individuals interested in entrepreneurship, today and in the future, on a domestic and global basis.” – Robert D. Hisrich, Director – Walker Center and Garvin Professor of Global Entrepreneurship, Thunderbird School of Global Management

“Entrepreneurship is perhaps not just the most multifaceted but also the most important concept of the modern socio-economic disciplines. This book makes an invaluable contribution in this fascinating area: it presents a multifaceted socio-economic examination of the impact of entrepreneurship for growth.” – Roy Thurik, Erasmus School of Economics in Rotterdam and Montpellier Business School

Entrepreneurship Routledge

The shadow economy has become the focus of policy makers around the world. This timely book explores the relationship between entrepreneurship and the shadow economy by reviewing how to measure,

explain and tackle this hidden enterprise culture. The editors bring together leading authorities in the field to examine existing methods to measure the shadow economy, explore entrepreneurship and shadow economy practices in various contexts, and provide policy suggestions for decreasing the shadow economy. It concludes by encouraging further research in this ever-growing field.

A Global Perspective Routledge

Entrepreneurs exist in every country but the nature and level of entrepreneurial activity differs remarkably. Why is this? What shapes the level of entrepreneurial activity in each country? What defines entrepreneurial activity? As more and more teaching and research into entrepreneurship reflects its often international nature, the need for literature reflecting this grows. This concise new textbook provides an introduction to topics in entrepreneurship in a global context; focusing on how enterprise works across the world. Important topics such as financing, innovation and (anti) social enterprise are discussed in detail throughout the text and examples and case studies are used to

illustrate the application of different theoretical and conceptual approaches to entrepreneurship and the role it plays in developed, emerging and transitional economies. *Entrepreneurship: A Global Perspective* is suitable for both final year undergraduate and postgraduate courses in enterprise and is likely to appeal particularly to student groups with a strong international element.

Entrepreneurship and the Shadow Economy Routledge

As entrepreneurship education grows across disciplines and permeates through various areas of university programs, this timely book offers an interdisciplinary, comparative and global perspective on best practices and new insights for the field. Through the theoretical lens of collaborative partnerships, it examines innovative practices of entrepreneurship education and advances understanding of the discipline.

The Role of Resources and Capabilities Springer

Over the past century, an extensive literature has developed, exploring the impact of entrepreneurship on economic performance. The active participation of

entrepreneurs in virtually all aspects of business and economic activity has obliged policy makers within the global economy to consider entrepreneurship as a determining variable in any political force, not only for bodies and groups created specifically to this end, but also for any decision-making body. To this end, specific actions promoting entrepreneurship have already been established around the world. However, the particular dynamics of entrepreneurship by women present unique opportunities and challenges. The women's perspective has often been overlooked in research, practice, and policymaking, and yet yields rich insights and implications. This volume features research from an international array of authors, global data, and in-depth analysis of women's entrepreneurial activity in Europe, Latin America, the United States, and Canada, to shed light on the positive impact of women's entrepreneurship on economic growth and development. The first part covers a broad range of concepts relating to the history and context of the female economic perspective. The second part focuses on performance and success

factors, with respect to such issues as innovation, social needs, and entrepreneurial orientation. The third part addresses issues of financing, including discussion of access to capital, microcredit, and entrepreneurial behavior. The fourth part considers additional topics, such as work-family balance and access to education. Together, the chapters offer new perspectives on the unique characteristics of women entrepreneurs and their contributions to economic development in theory, practice, and policymaking.

Frontiers in Entrepreneurship Routledge
Introducing a new concept in family businesses Transgenerational Entrepreneurship addresses how these businesses achieve growth and longevity through entrepreneurial activities. It focuses on the resources, capabilities and mindsets that families develop and draw upon in order to be entrepreneurial across generations, and presents findings from an international research collaboration between family business researchers and practitioners. In addition to a comprehensive conceptual chapter, the editors include a unique set of empirical

case-based research papers that investigates transgenerational entrepreneurship in different European contexts. They bring together and integrate frontier research on entrepreneurship and family business, as well as provide a basis for future research. Academics, teachers and students in business and management, entrepreneurship and family business will find this path-breaking book of value, as will libraries, policy makers and consultants.

Contemporary Entrepreneurship Routledge

The development of entrepreneurial abilities in people with dyslexia is a subject of great interest. It has gained increasing importance in economically difficult times because of its potential for the development of new business opportunities. This book brings together contributions from researchers, educators, and entrepreneurs with dyslexia, investigating this subject from many perspectives. Is there something different in the profile of a person with dyslexia that supports the development of entrepreneurship? This book aims to draw out key themes which can be used in

education to motivate, mentor, and create the business leaders of tomorrow. It offers a fundamental text for this area of study with a comprehensive, international examination of its topic. It includes views by new and established international writers and researchers, providing up-to-date perspectives on entrepreneurship, dyslexia, and education. It is accessible to read, to understand, and to learn from, and is suitable for recommended reading for graduate and postgraduate students. The diverse views and perspectives demonstrated in this book make it as relevant as possible for a wide group of readers. It informs study in the fields of business and dyslexia, and will be of interest to educators, researchers, and to anyone interested in the overlap of entrepreneurship and dyslexia.

Grounding Contemporary Theories of Practice into Entrepreneurship Studies
Routledge

Entrepreneurship is largely considered to be a positive force, driving venture creation and economic growth. Critical Perspectives on Entrepreneurship questions the accepted norms and dominant assumptions of scholarship on

the matter, and reveals how they can actually obscure important questions of identity, ideology and inequality. The book's distinguished authors and editors explore how entrepreneurship study can privilege certain forms of economic action, whilst labelling other, more collective forms of organization and exchange as problematic. Demystifying the archetypal vision of the white, male entrepreneur, this book gives voice to other entrepreneurial subjectivities and engages with the tensions, paradoxes and ambiguities at the heart of the topic. This challenging collection seeks to further the momentum for alternate analyses of the field, and to promote the growing voice of critical entrepreneurship studies. It is a useful tool for researchers, advanced students and policy-makers.

The Wellbeing of Women in Entrepreneurship Exploring Entrepreneurship

This book explores whether there is reason to be against entrepreneurship. Just like literature on the darker sides of entrepreneurs and entrepreneurship, the book is an answer to the one-sided, overly positive and uncritical image of

entrepreneurship. The "twist" in this book, in comparison with literature on dark sides of entrepreneurship, is to explore being against entrepreneurship. From various perspectives such as lexical semantics, Marxism, philosophy of science and psychology, the contributors contemplate on why there may be reason to be against entrepreneurship discourse as well as entrepreneurship practice. Some chapters are based on first-hand empirical data, others are conceptual. The main overall conclusion is that there are some strong arguments for being against entrepreneurship discourse, as well as for being against certain aspects of entrepreneurship practice. Before it is reasonable to be against entrepreneurship practice in total, a convincing and practicable alternative needs to be developed. This book will be valuable reading for entrepreneurship scholars, as well as academics working in the fields of business ethics, (critical) management, and international business.

Discovering, Creating and Seizing Opportunities for Blended Value Generation
Red Globe Press

Organizations in the creative and cultural

sector are experiencing transformational change. This book offers a new way of exploring the transformational processes that these organizations are going through, by focusing on their organizational space. By bringing together theoretical and empirical contributions from international scholars belonging to different fields of research, such as management, entrepreneurship, sociology, philosophy and anthropology, this volume seeks to provide readers with a multifaceted, comprehensive understanding of the changes that creative and cultural organizations are facing. By exploring them from an original perspective - the spatial one - this volume provides the foundations for developing a coherent research debate on the spatial dimension of creative and cultural organizations, leading to a new research agenda. This book contributes to our understanding of the 'space' of the creative and cultural industries and will be a useful reading for scholars involved in arts and cultural management in particular, as well as the social and human sciences more broadly. This book will inspire and inform researchers and

managers who look with curiosity at the changes taking place in the creative and cultural sectors.

Economics, Education and Youth Entrepreneurship Springer

There is growing interest in the relationship between gender and entrepreneurial activity. In this book, 37 eminent scholars from diverse academic disciplines contribute cutting-edge research that addresses, from a gender perspective, three general areas of importance: key characteristics of entrepreneurs, key performance attributes of entrepreneurial firms, and the role of financial capital in the establishment and growth of entrepreneurial firms and in their growth.

Transnational Entrepreneurship in South East Asia Springer Nature

This title was first published in 2003. This book provides an innovative, fresh approach to entrepreneurship. It puts forward a flexible, expansive conceptualization of the continuum of entrepreneurial behaviour and integrates context, culture, social networks and entrepreneurship as an embedded activity. Motivated by a desire to bridge

traditional academic boundaries the editors craft a heterodox perspective which interweaves strands from feminist and new institutional economics, sociology, management, finance, marketing and social policy. Contemporary themes of major significance highlighted include the importance of new technology, ethics, culture and identity, and entrepreneurship for indigenous, younger and older people as distinct groups. Social Entrepreneurship and Social Enterprises Routledge

The way organizations manage entrepreneurship has changed dramatically over the past decade. Today, organizations take account of economic issues, but they also adopt a broader perspective of their purpose including social and environmental issues (i.e. sustainability). Yet, despite its global spread, sustainable entrepreneurship remains an uncertain and poorly defined ambition with few absolutes. This book reaffirms the important need to improve comprehension and explore the subtleties of how individuals, groups, and organizations can discover, create, and seize opportunities for blended value

generation, by designing and operating sustainable ventures. It examines, in an interdisciplinary fashion and across sectoral and geographical boundaries, how entrepreneurial activities can be developed to be generally consistent with sustainable development goals, as well as by whom, for what reasons, and with what implications. The Editors comprehensively

review key dimensions of the sustainable entrepreneurship phenomenon to establish an essential definition and up-to-date picture of the field. The 19 chapters cover 4 main topics: Understanding the intentions and motivations for sustainable entrepreneurship Fostering and enacting sustainability through entrepreneurial action Leading and inspiring sustainable

entrepreneurial action Finding the contextually grounded implications of and challenges to sustainable entrepreneurship and blended value generation This book is an important resource for entrepreneurs and policy makers as well as students in the fields of entrepreneurship, innovation, and sustainability.
