This publication makes a valuable contribution to often problematic and pertinent South African higher education issues such as student access and success, student learning, student support and student engagement. In this regard, the authors draw on the works of higher education theorists such as Kuh, Tinto, Marton and Saeljoe. The book is primarily a helpful resource for South African learners in school, students at universities, life orientation teachers, as well as parents of prospective university students. It will especially assist students to adapt to the university environment.

Information and Communication Technology (ICT) is becoming indispensable in the spheres of business, government, education and entertainment. It makes Internet marketing, e-government, e-learning and online chat services possible. And its commercial aspect, e-commerce, is part of this trend. Today, no business training is complete without the inclusion of at least the basics of e-commerce. But although e-commerce has opened up new opportunities, it also presents threats and risks. The success of e-commerce hinges

on security and trust. Every business manager should therefore have a fundamental awareness of the meaning of e-commerce and ICT security and risk management. This second edition provides guidelines for overcoming these challenges by exploring the ways in which entrepreneurs and managers should cooperate with IT experts to exploit opportunities and combat the threats imposed by new technologies.

IEEE Circuits & Devices Juta and Company Ltd

This is the 32nd edition of the publication which contains over 2,500 entries giving information about post-secondary education and training opportunities in all academic and professional fields in 147 countries for years 2004 and 2005. It has a special focus on distance education, including open and distance learning

(ODL) with an annotated listing of online directories and databases of ODL courses worldwide. Information is also given on courses, scholarships and financial assistance available to foreign students, recognition of studies and diplomas obtained abroad, and key issues students should consider before embarking on higher education study. The text is written in English, French and Spanish.

Recent shifts in the contemporary cultural, political, and religious landscape are engendering intensive attention concerning political theology. New trends and traditional ideas equally colour these movements. Given that a medley of recent books and articles have exhaustively treated both the history and the current resurgence of political theology, we now find ourselves faced with the task of reinventing and redefining the future of political theology. This book presents a rich overview of fresh, contemporary theoretical approaches uniquely prioritizing the prospects of the future of political theology, but also making room for significant interventions from philosophy and political theory. Including prominent essays on Judaic, Islamic, Buddhist and Christian perspectives, this book balances elements from post-modern theology with more classical as well as anti-post-modern approaches.
