MICHAEL MAYA

Model Driven Engineering Languages and Systems CABI

Many scientists and engineers consider themselves poor writers or find the writing process difficult. The good news is that you do not have to be a talented writer to produce a good scientific paper, but you do have to be a careful writer. In particular, writing for a peer-reviewed

scientific or engineering journal requires learning and executing a specific formula for presenting scientific work. This book is all about teaching the style and conventions of writing for a peer-reviewed scientific journal. From structure to style, titles to tables, abstracts to author lists, this book gives practical advice about the process of writing a paper and getting it published.

This book constitutes the refereed proceedings of the 6th International Conference on Advances in Visual Informatics, IVIC 2019, held in Bangi, Malaysia, in November 2019. The 65 papers presented were carefully reviewed and selected from 130 submissions. The papers are organized into the following topics: Visualization and Digital Innovation for Society 5.0; Engineering and Digital Innovation for Society 5.0; Cyber Security and Digital Innovation for Society 5.0; and Social Informatics and Application for Society

5.0.

This book is a comprehensive study of the coins minted by Apamea, Larissa, Raphanea, Emesa and Laodicea ad Libanum in Syria during the late Hellenistic and Roman periods. It offers a historical overview of the individual cities, followed by in-depth discussions of the production, circulation, metrology and iconography of the coins. The text is supplemented with numerous die studies providing a structural framework of the various issues. A catalogue of 1,367 coins is also provided. Detailed discussions of the coinages and comparisons with contemporaneous issues of neighbouring

mints reveal the diverse nature of the coins. The volume bridges the gaps in our understanding of coinage in the Orontes Valley and surrounding regions.

These proceedings contain the scientific contributions presented at the 2nd Asian Rock Mechanics Symposium (ISRM 2001 - 2nd ARMS). The theme of the symposium was "Frontiers of Rock Mechanics and Sustainable Development in the 21st Century".

The Hidden Silly Side of Higher Education

CRC Press
Results of regular monitoring of the species diversity and structure of plant

communities is used by conservation biologists to help understand impacts of perturbations caused by humans and other environmental factors on ecosystems worldwide. Changes in plant communities can, for example, be a reflection of increased levels of pollution, a response to long-term climate change, or the result of shifts in land-use practices by the human population. This book presents a series of essays on the application of plant biodiversity monitoring and assessment to help prevent species extinction, ecosystem collapse, and solve problems in biodiversity conservation. It has been written by a large international team of researchers and uses

case studies and examples from all over the world, and from a broad range of terrestrial and aquatic ecosystems. The book is aimed at any graduate students and researchers with a strong interest in plant biodiversity monitoring and assessment, plant community ecology, biodiversity conservation, and the environmental impacts of human activities on ecosystems.

PUBLISHERS

This book presents papers from the International Conference on Power Transmissions 2016, held in Chongqing, China, 27th-30th October 2016. The main objective of this conference is to

provide a forum for the most recent advances, addressing the challenges in modern mechanical transmissions. The conference proceedings address all aspects of gear and power transmission technology and a range of applications. The presented papers are catalogued into three main tracks, including design, simulation and testing, materials and manufacturing, and industrial applications. The design, simulation and testing track covers topics such as new methods and designs for all types of transmissions, modelling and simulation of power transmissions, strength, fatigue, dynamics and reliability of power

transmissions, lubrication and sealing technologies and theories, and fault diagnosis of power transmissions. In the materials and manufacturing track, topics include new materials and heat treatment of power transmissions, new manufacturing technologies of power transmissions, improved tools to predict future demands on production systems, new technologies for ecologically sustainable productions and those which preserve natural resources, and measuring technologies of power transmissions. The proceedings also cover the novel industrial applications of power transmissions in marine, aerospace and

railway contexts, wind turbines, the automotive industry, construction machinery, and robots. Cash, Color, and Colonialism Disha Publications
This book contains papers describing the major scientific achievements supported by European funding in the area of Future Internet. It is published in the context of FIA, the Future Internet Assembly¹, which is structured to permit interactions across technical domains from researchers and other stakeholders active in Future Internet research. FIA holds two meetings per year and calls on those involved in relevant funded research projects to participate actively and to steer its work. On 31

March, 2008 the Bled Declaration "Towards a European approach to the Future Internet"² was officially presented at the FIA Conference in Bled, Slovenia "In the future, even more users, objects, services and critical information infrastructures will be networked through the Future Internet which will underpin an ever larger share of our modern and global economies. It is therefore time to strengthen and focus European activities on the Future Internet to maintain Europe's competitiveness in the global marketplace. A significant change is required and the European Internet scientific and economic actors, researchers, industrialists, SMEs, users, service and content providers, now

assert the urgent necessity to redesign the Internet, taking a broad multidisciplinary approach, to meet Europe's societal and commercial ambitions." *Resources in Education* Springer
 eWork and eBusiness in Architecture, Engineering and Construction 2016 collects the papers presented at the 11th European Conference on Product & Process Modelling (ECPMP 2016, Cyprus, 7-9 September 2016), The contributions cover complementary thematic areas that hold great promise for the advancement of research and technological development in the modelling of complex engineering systems, encompassing a substantial number of

high quality contributions on a large spectrum of topics pertaining to ICT deployment instances in AEC/FM, including: • Information and Knowledge Management • Construction Management • Description Logics and Ontology Application in AEC • Risk Management • 5D/nD Modelling, Simulation and Augmented Reality • Infrastructure Condition Assessment • Standardization of Data Structures • Regulatory and Legal Aspects • Multi-Model and distributed Data Management • System Identification • Industrialized Production, Smart Products and Services • Interoperability • Smart Cities • Sustainable Buildings

and Urban Environments • Collaboration and Teamwork • BIM Implementation and Deployment • Building Performance Simulation • Intelligent Catalogues and Services Frontiers of Rock Mechanics and Sustainable Development in the 21st Century Plant Biodiversity Monitoring, Assessment and Conservation Within the context of U.S.-Indian law, federal acknowledgment establishes a trust relationship between an Indian tribe and the U.S. government. Some tribes, however, have not been federally acknowledged, or, in more common language, “recognized.” In Cash,

Color, and Colonialism, René Ann Cramer offers a comprehensive analysis of the federal acknowledgment process, placing it in historical, legal, and social context.

Research Notes

Springer Science & Business Media

The MODELS series of conferences is the premier venue for the exchange of innovative technical ideas and experiences focusing on a very important new technical discipline: model-driven software and systems engineering. The expansion of this discipline is a direct consequence of the increasing significance and success of model-based methods in practice. Numerous efforts resulted in the invention of concepts, languages and tools for

the definition, analysis, transformation, and verification of domain-specific modeling languages and general-purpose modeling language standards, as well as their use for software and systems engineering. MODELS 2010, the 13th edition of the conference series, took place in Oslo, Norway, October 3-8, 2010, along with numerous satellite workshops, symposia and tutorials. The conference was fortunate to have three prominent keynote speakers: Ole Lehrmann Madsen (Aarhus University, Denmark), Edward A. Lee (UC Berkeley, USA) and Pamela Zave (AT&T Laboratories, USA). To provide a broader forum for reporting on scientific

progress as well as on experience stemming from practical applications of model-based methods, the 2010 conference accepted submissions in two distinct tracks: Foundations and Applications. The primary objective of the first track is to present new research results dedicated to advancing the state-of-the-art of the discipline, whereas the second aims to provide a realistic and verifiable picture of the current state-- the practice of model-based engineering, so that the broader community could be better informed of the capabilities and successes of this relatively young discipline. This volume contains the final version of the papers

accepted for presentation at the conference from both tracks.
Education And Awareness Of Sustainability - Proceedings Of The 3rd Eurasian Conference On Educational Innovation 2020 (Ecei 2020) Routledge
If you think the groves of academe are all stuffiness, elbow patches and greying old men... think again. Academia Obscura is an irreverent glimpse inside the ivory tower, exposing the eccentric and slightly unhinged world of university life. Take a trip through the spectrum of academic oddities and unearth the Easter eggs buried in peer reviewed papers, the weird and wonderful world of scholarly social media, and rats in underpants.

Procrastinating PhD student Glen Wright invites you to peruse his cabinet of curiosities and discover what academics get up to when no one's looking. Welcome to the hidden silly side of higher education.

Springer

The four volume set LNAI 3681, LNAI 3682, LNAI 3683, and LNAI 3684 constitute the refereed proceedings of the 9th International Conference on Knowledge-Based Intelligent Information and Engineering Systems, KES 2005, held in Melbourne, Australia in September 2005. The 716 revised papers presented were carefully reviewed and

selected from nearly 1400 submissions. The papers present a wealth of original research results from the field of intelligent information processing in the broadest sense; topics covered in the first volume are intelligent design support systems, data engineering, knowledge engineering and ontologies, knowledge discovery and data mining, advanced network application, approaches and methods of security engineering, chance discovery, information hiding and multimedia signal processing, soft computing techniques and their applications, intelligent agent technology and applications, smart systems, knowledge - based interface

systems, intelligent information processing for remote sensing, intelligent human computer interaction systems, experience management and knowledge management, network (security) real-time and fault tolerant systems, advanced network application and real-time systems, and intelligent watermarking algorithms.

eWork and eBusiness in Architecture, Engineering and Construction: ECPPM 2016 SAGE Publications

This book constitutes the refereed proceedings of the Fourth IFIP WG 8.5 International Conference, ePart 2012, held in Kristiansand, Norway,

in September 2012. The 14 revised full papers presented were carefully reviewed and selected from numerous submissions. This volume includes complete research work organised in five groups as follows: • Keynote Speech • Reviews • Policy Consultations • Case Studies • Techniques and Analysis.

Pt. I: 9th International Conference, KES 2005, Melbourne, Australia, September 14-16, 2005, Proceedings Springer Science & Business Media

This book constitutes the refereed proceedings of the Fourth International Colloquium on Grammatical Inference, ICGI-98, held in Ames, Iowa, in July 1998. The

23 revised full papers were carefully reviewed and selected for inclusion in the book from a total of 35 submissions. The book addresses a wide range of grammatical inference theory such as automata induction, grammar induction, automatic language acquisition, etc. as well as a variety of applications in areas like syntactic pattern recognition, adaptive intelligent agents, diagnosis, computational biology, data mining, and knowledge discovery.

16th Asia Simulation Conference and SCS Autumn Simulation Multi-Conference, AsiaSim/SCS AutumnSim 2016, Beijing, China, October 8-11, 2016, Proceedings, Part II

The purpose of the 4th International Asia Conference on Industrial Engineering and Management Innovation (IEMI 2013) is to bring together researchers, engineers and practitioners interested in the application of informatics to usher in new advances in the industrial engineering and management fields.

6th International Visual Informatics Conference, IVIC 2019, Bangi, Malaysia, November 19-21, 2019, Proceedings
World Bank Publications

This book consists of one hundred and seventeen selected papers presented at the 2015 International Conference on Electronics, Electrical Engineering and

Information Science (EEEIS2015), which was held in Guangzhou, China, during August 07-09, 2015. EEEIS2015 provided an excellent international exchange platform for researchers to share their knowledge and results and to explore new areas of research and development. Global researchers and practitioners will find coverage of topics involving Electronics Engineering, Electrical Engineering, Computer Science, Technology for Road Traffic, Mechanical Engineering, Materials Science and Engineering Management. Experts in these fields contributed to the collection of research results and development activities.

This book will be a valuable reference for researchers working in the field of Electronics, Electrical Engineering and Information Science. Contents: Electronics Engineering, Electrical Engineering, Computer Science and Application Technology for Road Traffic, Mechanical Engineering, Material Science and Material Processing, Technology, Engineering Management. Readership: Researchers working in the field of Electronics, Electrical Engineering and Information Science.

The Politics of Tribal Acknowledgment

Springer

This book aims to achieve the following objectives: Equip students with

knowledge on the role of effective research. Introduce students to a range of methods applicable to research. Enable students to select appropriate and ethical-based methods research question. Enable students to understand the concept of a research proposal. Enable students to understand the rationale for writing a research proposal. To enable students understand the major components of a research proposal and final research report. To help students understand characteristics of a good research topic, a good title, and a good problem statement. To address common challenges experienced by students with regard to: - Unclear statement

of the problem and failure to show research gaps. - Poor explanation of theoretical framework through academic arguments. - Lack of precision in presenting a logical conceptual framework by focusing on the interacting variables and moderating variables in some cases. - Inconsistency in literature review not in tandem with the research objectives. - Unclear study design, methodology and methods of data analysis. - Unsystematic and unconventional referencing style. To enhance ones knowledge of ethics in research. To understand basic concepts in research. To enhance one's understanding of the

differences between qualitative and quantitative type of research. To enhance one's understanding of measurements. To prepare students for writing their proposal and final defense. To help students appreciate the importance of research methods in empirical world.

Conducting Online Surveys is a complete guide to conducting survey research using digital modalities.

Many topics discussed,

such as developing online and mobile questionnaires, are unique to digital surveys, whereas others, such as creating reliable survey questions, are common to all survey environments. The expansion of low-cost software options has opened up this area to a broad range of researchers, and the need for a comprehensive text for

developing, implementing, and reporting digital surveys is greater than ever. This Second Edition reflects the significant developments in technology and the methodological literature since the publication of the First Edition. It captures in one single volume everything you need to know about conducting digital surveys from start to finish.
