Causation is a crucial and complex issue in ascertaining whether a particular loss or damage is covered in an insurance policy or in a tort claim, and is an issue that cannot be escaped. Therefore, this unique book will assist practitioners in answering one of the most important questions in the handling of their insurance and tort claims. Through extensive

case law analysis, this book scrutinises the causation theory in marine insurance and non-marine insurance law, and provides a comparative study on the causation test in tort law. In addition, the author expertly applies causation questions in concrete scenarios, and ultimately, this book provides a single volume solution to a very complex but essential question of insurance law and tort law. Causation in Insurance Contract Law also comes with a

foreword written by Professor Robert Merkin. This book will be an invaluable guide for insurance industry professionals, as well as legal practitioners, academics and students in the fields of insurance and tort law. ?

The foundations for

modern contract law were laid between 1670 and 1870. Rather than

advancing a purely

chronological account,

this examination of the development of contract law doctrine in England during that time explores key themes in order to better understand the drivers of legal change.

These themes include the relationship between lawyers and merchants, the role of equity, the place of statute, and the part played by legal literature. Developments are considered in the context of the legal system of the time and through those who were involved in litigation as lawyers, judges, jurors or

litigants. It concludes that the way in which contract law developed was complex. Legal change was often uneven and slow, and some of the apparent changes had deep roots in the past. Clashes between conservative and more reformist tendencies were not uncommon.

The book provides a detailed review of efforts to reform the law on insurance warranties in Australia, New Zealand and the UK, arguing that

none of these have been successful. The text proposes a radical new approach to reform of this area of the law, demonstrating through detailed stress testing of these proposals that they would deliver more consistent and equitable outcomes than those achieved to date. Reform of the historically inequitable law of insurance warranties in commercial insurance has been introduced in Australia, New Zealand and, most recently, the UK. This book

demonstrates that all these reforms have flaws and that none of them can be relied upon to deliver consistently equitable and predictable outcomes; in particular the UK's, as yet largely untested, Insurance Act 2015 is shown to have serious flaws that have not previously been identified. Building on lessons from these three jurisdictions, the book sets out an alternative approach for dealing with breaches of insurance warranties and demonstrates that this

would consistently deliver better outcomes than any of the existing attempts at reforming this area of the law. Providing an unprecedented multi-jurisdictional review of the law on insurance

warranties and in particular the treatment of warranties in the Insurance Act 2015, as well as outlining an innovative and radical alternative approach to

reform, the book will be of considerable interest and value to practitioners, academics and students, as well as to other common law jurisdictions contemplating reform of this area of the law.
