*Genesis and the Jewish Antiquities of Flavius Josephus* Walter de Gruyter

History of the rival Spanish, Dutch, Portuguese, French and British Empires from 1700-1815.

The Expansion of Europe in the Eighteenth Century Oxford University Press, USA

Current religious belief and practice in Palestine during the century beginning with 50 B.C. are of interest not only to the historian of religion but to the interpreter of the Christian Scriptures. This book examines an important Jewish author from this period, Flavius Josephus, and studies in detail the changes which he made in presenting to a non-Jewish world an understanding of Genesis that he had received from living in Palestine.

Postwar Economic Reconstruction and Lessons for the East Today Univ of California Press

An eclectic history of human curiosity, a great feast of ideas, and a memoir of a reading life from an internationally celebrated reader and thinker Curiosity has been seen through the ages as the impulse that drives our knowledge forward and the temptation that leads us

toward dangerous and forbidden waters.

The question "Why?" has appeared under a multiplicity of guises and in vastly different contexts throughout the chapters of human history. Why does evil exist? What is beauty? How does language inform us? What defines our identity? What is our responsibility to the world? In Alberto Manguel's most personal book to date, the author tracks his own life of curiosity through the reading that has mapped his way.

Manguel chooses as his guides a selection of writers who sparked his imagination. He dedicates each chapter to a single thinker, scientist, artist, or other figure who demonstrated in a fresh way how to ask "Why?" Leading us through a full gallery of inquisitives, among them Thomas Aquinas, David Hume, Lewis Carroll, Rachel Carson, Socrates, and, most importantly, Dante, Manguel affirms how deeply connected our curiosity is to the readings that most astonish us, and how essential to the soaring of our own imaginations.

"Crisis in Ukraine" sets the intellectual stage for understanding the turmoil in eastern Europe, what is really at stake, and what will come next. The arguments presented span the ideological spectrum, and the authors include a range of leading experts from several disciplines and countries, including Yuliya Tymoshenko, Alexander Motyl, Orlando Figes, Kathryn Stoner, Daniel Treisman, Brian Taylor, Kathleen McNamara, and more. Released as policymakers in Washington and other capitals debate how to handle Ukraine, this book contains everything needed for readers to develop informed opinions of their own.

The case studies in this book examine significant parallels between the situation in Eastern Europe today and the issues facing Europe and Japan after World War II, offering insights on what kinds of policy actions will be most effective in this difficult period of reconstruction. The breakup of the Soviet Union and the consequent extraordinary problems faced by Eastern European nations raise pressing economic questions. The case studies in this book examine significant parallels between the situation in Eastern Europe today and the issues facing Europe and Japan after World War II, offering insights on what kinds of policy actions will be most effective in this difficult period of reconstruction. The essays address such topics as the relative roles of government and the market; economic openness; industrial conversion from war to peacetime production; the roles of institutions, enterprises, the business community, and their work staffs; and external control of policy measures, of resources made available by the outside world, and of the general external environment. In their introductory chapter, the editors provide an overview that addresses the question of whether reconstruction can ever be managed smoothly.

From the Ice Age to the Cold War and beyond, from Reykjavik to Riga, from Archimedes to Einstein, Alexander to Yeltsin, here between the covers of a single volume Norman Davies tells the story of Europe, East and West, from prehistory to the present day. The book's absorbing narrative lays down the chronological and geographical grid on

which the dramas of European history have been played out. It zooms in from the distant focus of Chapter One, which explores the first five million years of the continent's evolution, to the close focus of the last two chapters, which cover the twentieth century at roughly one page per year. In between, Norman Davies presents a huge and sweeping canvas packed with fascinating detail, analysis, and anecdote. Alongside Europe's better-known stories - human, national, and continental - he brings into focus areas often ignored or misunderstood, remembering the stateless nation as well as the nation-state. Minority communities, from heretics and lepers to Jews, Romanians, and Muslims have not been forgotten. This masterly history reveals not only the rich variety of Europe's past but also the many and rewarding prisms through which it can be viewed. Each chapter contains a selection of telephoto 'capsules', illustrating narrower themes and topics that cut across the chronological flow. Davies then concludes with a wide-angle 'snapshot' of the whole continent as seen from one particular vantage point. The overall effect is stunning: a kind of historical picture album, with panoramic tableaux interspersed by detailed insets and close-ups. Never before has such an ambitious history of Europe been attempted. In range and ambition, the originality of its structure and glittering style, Norman Davies's Europe represents one of the most important and illuminating history books to be published by Oxford. Time Capsules 201 fascinating articles interspersed throughout the narrative focus on incidents or topics as various as The Iceman of the Alps, Erotic Graffiti at Pompeii, Stradivarius, and Psychoanalysing Hitler. Each capsule can

be tasted as a separate self-contained morsel; or can be read in conjunction with the narrative into which it is inserted. Snapshots 12 panoramic overviews across the changing map of Europe freeze the frames of the chronological narrative at moments of symbolic importance, such as Knossos 1628 BC, Constantinople AD 330, and Nuremberg 1945. A fully illustrated history incorporates over 100 superbly detailed maps and diagrams, and 32 pages of black and white plates.

Himmelfarb adds four new essays. In

*Figurations of the Space Between* MIT

Melegh's work offers a powerful analysis

of the sociological and symbolic

meanings of East-West in Europe after

the end of the Cold War. While the

fundamental poles of East and West

remain, both their meaning and their

relationship to one another have shifted

profoundly since the late 1970s. Melegh

exposes the underbelly of liberal

characterizations of East-West,

highlighting the polarizing effect of extreme nationalism and ethnic racism. The theoretical underpinnings of this work involve the ideas of preeminent theorists such as Karl Mannheim, Michel Foucault and more recently Maria Todorova and Iver Neumann. This work casts into fine relief how the "East-West Slope" oriented negatively from West to East has emerged from liberal characterizations of this project. The book analyzes the historical change in East-West discourses from a modernizationist type to a new/old civilizational one. In addition, this is one of the first attempts to link post-colonial analysis to developments in Eastern Europe.

Over the last sixty years scholars have increasingly become aware of links connecting early Greek poetry with the literatures of the ancient Near East. open to cultural imports from western Asia: agriculture, metal-working, writing, religious institutions, artistic fashions, musical instruments, and much more. Over the last sixty years scholars have increasingly become aware of links connecting early Greek poetry with the literatures of Mesopotamia, Anatolia, Canaan, and Israel. Martin West's new book far surpasses previous studies in comprehensiveness, demonstrating these links with massive and detailed documentation and showing that they are much more fundamental and pervasive than has hitherto been acknowledged. His survey embraces Hesiod, the Homeric epics, the lyric poets, and Aeschylus, and concludes with an illuminating discussion of possible avenues of transmission between the orient and Greece. He believes that an age has dawned in which Hellenists will no more be able to ignore Near Eastern literature than Latinists can ignore Greek. -

*The Columbia Gazetteer of the World: A to G* Council on Foreign Relations Press  
The function of the state as a symbol of identity has become increasingly important as major powers of the pre-Cold War era have given way to self-determination. The conventional role of the state has, however, simultaneously been challenged by the process of globalisation which transcends such national boundaries. Barbara Emadi-Coffin seeks to explain this contradiction through a radical new theory. There are now 37,000 multinational corporations in the world, many of which are increasingly seen as being among the new centres of political and economic power. Barbara Emadi-Coffin analyses the increasing interaction of multinational corporations, international organizations and transnational interest

groups, such as Greenpeace and Amnesty International, in processes of the global political economy. Using examples of the free trade zones in Korea, the UK and the People's Republic of China, the author demonstrates these interactions. In so doing, she challenges prevailing notions surrounding International Organization theory.

A sixth edition of this book is now available. Now in a fully updated fifth edition, this premier text has been thoroughly revised to reflect the sweeping changes the past decade has brought to Europe. Long hailed for its creativity and intellectual depth, the book is now further enriched by the expertise of a new lead author, noted geographer Alexander B. Murphy. In this edition, he has focused on Europe's role in the wider world and incorporated new research and teaching approaches in regional geography. The topical organization including environment, ethnicity, religion, language, demography, politics, industry, and urban and rural life offers students a holistic understanding of the diverse

Negotiators of Change covers the history of ten tribal groups including the Cherokee, Iroquois and Navajo -- as well as tribes with less known histories such as the Yakima, Ute, and Pima-Maricopa. The book contests the idea that European colonialization led to a loss of Native American women's power, and instead presents a more complex picture of the adaption to, and subversion of, the economic changes introduced by Europeans. The essays also discuss the changing meanings of motherhood, women's roles and differing gender ideologies within this context.
