Long distance radars use the lower microwave Microwave Theory And Applications Microwave radar is widely used for applications such as air traffic control, weather forecasting, navigation of ships, and speed limit enforcement. Long distance radars use the lower microwave frequencies since at the upper end of the band atmospheric absorption limits the range, but millimeter waves are used for short range radar such as collision avoidance systems . Microwave Theory and Applications: Adam, Stephen F ... Microwave engineering pertains to the study and design of microwave circuits, components, and systems. Fundamental principles are applied to analysis, design and measurement techniques in this field. The short wavelengths involved distinguish this discipline from electronic engineering. This is because there are different interactions with circuits,

transmissions and propagation characteristics at microwave frequencies. Some theories and devices that pertain to this field are antennas, radar, tr
