Hodder Arnold

The Council of Europe released a preliminary version of the Manual for Relating Language Examinations to the Common European Framework of Reference for Languages (CEFR) in 2003. Over the next 5 years a wide range of institutions and individuals undertook case studies to pilot this draft version. Towards the close of the piloting phase, a two-day colloquium was held in Cambridge, UK enabling practitioners and academics to reflect on and share their experiences of

applying the Manual procedures. Insights from this colloquium informed the Manual revision project during 2008/2009. This volume features selected case studies presented at the Cambridge Colloquium in December 2007. They include the linking of a single test to the CEFR, the CEFR-linking of suites of examinations at different levels and large scale national projects undertaken by examination boards and specialist research institutes. Some studies focus on part of an examination, while others involve all test components. Some apply one or two of the procedures - familiarisation, specification, standardisation, and empirical validation. As well as describing their studies and reporting their findings, contributors reflect and comment on their experience of using the draft Manual. A clear and comprehensive introductory chapter explains the development of the CEFR and the draft Manual for linking tests, and discusses its relevance for the future. The volume will be of interest to examination boards, language test developers and educational policy-makers, as well as academic lecturers, researchers and graduate students interested in the

principles and practice of aligning tests to the CEFR.

In this exhilarating and often hilarious book, David Crystal examines why we devote so much time and energy to language games, how professionals make a career of them, and how young children instinctively take to them. Crystal makes a simple argument-that since playing with language is so natural, a natural way to learn language is to play with it-while he discusses puns, crosswords, lipograms, comic alphabets, rhymes, funny voices taken from dialect and popular culture, limericks, anagrams, scat singing, and much more.

One of The Economist's 2011 Books of the Year Did Garibaldi do Italy a disservice when he helped its disparate parts achieve unity? Was the goal of political unification a mistake? These questions are asked and answered in a number of ways in this engaging, original consideration of the many histories that contribute to the brilliance-and weakness-of Italy today. David Gilmour's wonderfully readable exploration of Italian life over the centuries is filled with provocative anecdotes as well as personal

observations, and is peopled with the great figures of the Italian past-from Cicero and Virgil to Dante and the Medicis, from Garibaldi and Cavour to the controversial politicians of the twentieth century. Gilmour's wise account of the Risorgimento, the pivotal epoch in modern Italian history, debunks the nationalistic myths that surround it, though he paints a sympathetic portrait of Giuseppe Verdi, a beloved hero of the era. Gilmour shows that the glory of Italy has always lain in its regions, with their distinctive art, civic cultures, identities, and cuisines. Italy's inhabitants identified themselves not as Italians but as Tuscans and Venetians, Sicilians and Lombards, Neapolitans and Genoese. Italy's strength and culture still come from its regions rather than from its misconceived, mishandled notion of a unified nation. With *The Pursuit of Italy*, David Gilmour has provided a coherent, persuasive, and entertaining interpretation of the paradoxes of Italian life, past and present.
