This "one-of-a-kind read" offers insightful essays, poignant life advice, and pithy pearls of wisdom from the comedian and star of HBO's *Insecure* (Entertainment Weekly). Anyone who has seen Amanda Seales's acclaimed stand-up special *I Be Knowin*, her long-running TV series *Insecure*, or her groundbreaking gameshow *Smart Funny & Black*, knows that this woman is a force of nature. In both life and career, she has fearlessly and passionately charted her own course. Now she's bringing her life's lessons and laughs to the page with her signature blend of academic intellectualism, Black American colloquialisms, and pop culture fanaticism. This volume of essays, axioms, original illustrations, and photos provides Seales's trademark "self-help from the hip" style of commentary, fueled by ideology formed from her own victories, struggles, research, mistakes, risks, and pay-offs. Unapologetic, fiercely funny, and searingly honest, *Small Doses* engages, empowers, and enlightens readers on how to find their truths while still finding the funny!

The contents of this message upon prayer should be read alike by preacher and teacher, evangelist and intercessor. Its pages contain an appeal to every "worker together with Christ," and stimulate the desire for prayer in the varied relationships of Christian life. The appeal deserves a wide circulation amongst members of Prayer Circles and Prayer Unions, and, indeed, amongst all who are looking for a revival of true religion in our land, and an exodus of ambassadors for Christ to heathen and Moslem populations. -- Albert A. Head.

There are many distinct pleasures associated with computer programming. Craftsmanship has its quiet rewards, the satisfaction that comes from building a useful object and making it work. Excitement arrives with the flash of insight that cracks a previously intractable problem. The spiritual quest for elegance can turn the hacker into an artist. There are pleasures in parsimony, in squeezing the last drop of performance out of clever algorithms and tight coding. The games, puzzles, and challenges of problems from international programming competitions are a great way to experience these pleasures while improving your algorithmic and coding skills. This book contains over 100 problems that have appeared in previous programming contests, along with discussions of the theory and ideas necessary to attack them. Instant online grading for all of these problems is available from two WWW robot judging sites. Combining this book with a judge gives an exciting new way to challenge and improve your programming skills. This book can be used for self-study, for teaching innovative courses in algorithms and programming, and in training for international competition. The problems in this book have been selected from over 1,000 programming problems at the Universidad de Valladolid online judge. The judge has ruled on well over one million submissions from 27,000 registered users around the world to date. We have taken only the best of

the best, the most fun, exciting, and interesting problems available.
